### **Death and the Body in the**

**Eighteenth-Century Novel** Jolene Zigarovich, 2023-01-10 Death and the Body in the Eighteenth Century Novel demonstrates that archives continually speak to the period's rising funeral and mourning culture as well as the increasing commodification of death and mourning typically associated with nineteenth century practices Drawing on a variety of historical discourses such as wills undertaking histories medical treatises and textbooks anatomical studies philosophical treatises and religious tracts and sermons the book contributes to a fuller understanding of the history of death in the Enlightenment and its narrative transformation Death and the Body in the Eighteenth Century Novel not only offers new insights about the effect of a growing secularization and commodification of death on the culture and its productions but also fills critical gaps in the history of death using narrative as a distinct literary marker As anatomists dissected undertakers

preserved jewelers encased and artists figured the corpse so too the novelist portrayed bodily artifacts Why are these morbid forms of materiality entombed in the novel Jolene Zigarovich addresses this complex question by claiming that the body itself its parts or its preserved representation functioned as secular memento suggesting that preserved remains became symbols of individuality and subjectivity To support the conception that in this period notions of self and knowing center upon theories of the tactile and material the chapters are organized around sensory conceptions and bodily materials such as touch preserved flesh bowel heart wax hair and bone Including numerous visual examples the book also argues that the relic represents the slippage between corpse and treasure sentimentality and materialism and corporeal fetish and aesthetic accessory Zigarovich s analysis compels us to reassess the eighteenth century response to and representation of the dead and dead like body and its material purpose and use in fiction In a broader framework Death and the Body in the Eighteenth Century Novel also narrates a history of the novel that speaks to the cultural formation of modern individualism
