**MAA Studies in Mathematics** Aubert Daigneault, 1974     *Hajnal Andr ka and Istv n N meti on Unity of Science* Judit Madarász, Gergely Székely, 2021-05-31 This book features more than 20 papers that celebrate the work of Hajnal Andr ka and Istv n N meti It illustrates an interaction between developing and applying mathematical logic The papers offer new results as well as surveys in areas influenced by these two outstanding researchers They also provide details on the after life of some of their initiatives Computer science connects the papers in the first part of the book The second part concentrates on algebraic logic It features a range of papers that hint at the intricate many way connections between logic algebra and geometry The third part explores novel applications of logic in relativity theory philosophy of logic philosophy of physics and spacetime and methodology of science They include such exciting subjects as time travelling in emergent spacetime The short autobiographies of Hajnal Andr ka and Istv n N meti at the end of the book describe an adventurous journey from electric engineering and Maxwell s equations to a complex system of computer programs for designing Hungary s electric power system to exploring and contributing deep results to Tarskian algebraic logic as the deepest core theory of such questions then on to applications of the results in such exciting new areas as relativity theory in order to rejuvenate logic itself     *Handbook of Mathematical Logic* J. Barwise, 1982-03-01 The handbook is divided into four parts model theory set theory recursion theory and proof theory Each of the four parts begins with a short guide to the chapters that follow Each chapter is written for non specialists in the field in question Mathematicians will find that this book provides them with a unique opportunity to apprise themselves of developments in areas other than their own     Introduction to Higher-Order Categorical Logic J. Lambek, P. J. Scott, 1988-03-25 Part I indicates that typed calculi are a formulation of higher order logic and cartesian closed categories are essentially the same Part II demonstrates that another formulation of higher order logic is closely related to topos theory     *Stone Spaces* Peter T.
