Studies In Cognitive Finitude:

Studies in Cognitive Finitude Nicholas Rescher, 2013-05-02 For over thirty years Professor Rescher has been preoccupied with exploring the scope and limits of human knowledge from an array of different points of view. This book collects together these various threads into a unified treatment of this overall terrain. It argues in detail that while scepticism is about the prospect of factual knowledge about the world is emphatically unwarranted nevertheless the project of amplifying this knowledge does encounter some specifiable and insuperable limits.

On certainty and other philosophical essays on cognition Nicholas Rescher, 2013-05-02 *On Certainty* continues Rescher's longstanding practice of publishing occasional studies that form part of a wider program of investigation of the scope and limits of rational inquiry in the pursuit of understanding. And pragmatism forms a subtextual Leitmotiv of these essays seeing that the linking idea at work throughout is that knowledge is a tool for the management of our theoretical and practical affairs and that what we ask of it is serviceability for the uses we have in view.

Rescher Studies Robert Almeder, 2013-05-02 In a career extending over almost six decades Nicholas Rescher has conducted researches in almost every principal area of philosophy historical and systematic alike. In this extraordinary volume two dozen scholars join in offering penetrating discussions of various facets of Rescher's investigations. The result is an instructively critical panorama of the many faceted contributions of this important American philosopher. Born in Germany in 1928 Nicholas Rescher came to the U.S. at the age of nine. He is University Professor of Philosophy at the University of Pittsburgh where he has also served as Chairman of the Philosophy Department and as director and currently chairman of the Center for Philosophy of Science. In a productive research career extending over six decades he has established himself as a systematic philosopher of the old style. His work represents a many sided approach to fundamental philosophical issues that weaves together threads of thought from continental idealism and American pragmatism. And apart from this larger program Rescher has made various specific contributions to logic the conception autodescriptive systems of many sided logic the history of logic the medieval Arabic theory of modal syllogistic to the theory of knowledge epistemetrics as a quantitative approach in theoretical epistemology and to the philosophy of science the theory of a logarithmic retardation of scientific progress. Rescher has also worked in the area of futuristics and along with Olaf Helmer and Norman Dalkey is co-inaugurator of the so called Delphi method of forecasting. Ten books about Rescher's philosophy have been published in four languages. Rescher earned his doctorate at Princeton in 1951 while still at the age of twenty two a record for Princeton's Department of Philosophy. He has served as a President of the American Philosophical Association of the American Catholic Philosophy Association of the American G W Leibniz Society of the C S Peirce Society and of the American Metaphysical Society. He was the founder of the American Philosophical Quarterly. An honorary member of Corpus Christi College Oxford he has been elected to membership in the European Academy of Arts and Sciences Academia Europaea the Royal Society of Canada the Institut International de Philosophie and several other learned

academies Having held visiting lectureships at Oxford Constance Salamanca Munich and Marburg he has been awarded fellowships by the Ford Guggenheim and National Science Foundations Author of some hundred books ranging over many areas of philosophy over a dozen of them translated from English into other languages he is the recipient of eight honorary degrees from universities on three continents He was awarded the Alexander von Humboldt Prize for Humanistic Scholarship in 1984 the Belgian Prix Mercier in 2005 and the Aquinas Medal of the American Catholic Philosophical Association in 2007
