PREFACE In recent years there have been developments in education and training within the framework of the rapid advancement of technology and changing social needs The increase in innovative approaches has created opportunities for students worldwide and digital transformation in particular has played an important role in reshaping education Digital transformation in particular has played an important role in reshaping education From using digital tools to adopting online platforms and personalized learning and skill development education is experiencing a profound paradigm shift Researchers examining this field s main trends and developments are trying to contribute to the international field with their in depth studies The learning environment refers to the different physical spaces settings and platforms where students engage in learning Students can learn at school in the cafeteria out of school at home outdoors or in any digital environment as an alternative to the classroom Therefore the concept of learning environment covers a very wide range Today studies on learning environments physical social and emotional conditions surrounding the student technological digital student oriented learning environments attract attention This century where technology is at its peak and causes rapid changes in every field despite its positive contributions it may prevent students from developing critical and creative thinking skills For

this reason idealistic researchers in the field have focused their research on appropriate methods strategies and techniques for children to think multidimensionally This book chapter International Studies on Learning Environments focuses on important topics that will contribute to the field From computer games to the etymology and history of games from textbooks to argumentation based games and forest schools this academic perspective includes valuable research for academics students and teachers working in this field So much so that sometimes the passion for computer games overrides the commitment to school and the determination to work Computer games which children and young people spend a lot of time playing gradually reach the level of addiction technological Most of the environments time that support students in areas such as research problem solving critical thinking etc sometimes negatively affect children students with their uncontrolled involuntary and unconscious use However games play an important role in children s social cognitive and sociocultural development when they serve the right purpose Games which have a great impact on the satisfaction of children s sense of curiosity the development of self expression skills the acquisition of problem solving skills and the development of hand eye coordination have evolved into a virtual environment today especially in the field of Textbooks and digital textbooks e textbooks e texts as another learning environment are seen as comfort zones for students and teachers due to their ease of access and practicality In addition to structuring and developing learning guiding learning enabling self directed learning and contributing to assessment and evaluation they also transfer values and ideas By naturalizing the dominant view through the texts in the books it provides social control in a silent way Textbooks containing reading texts usually exhibit a structure that accompanies the social order rather than universal topics or definitions in order to contribute to the social order For this reason in textbooks women are placed in the family design with their roles as mothers and wives Men s roles on the other hand are to produce and have status by working outside Argumentation is very important for the effective realization of education and training Researchers are trying to develop new methods in every field of learning so that students can make comments and establish relationships between two knowledge objects from an early age One of these is the predict observe explain education method which is structured for science in a natural environment students education in schools Especially in science education it is seen as important to critically examine a claim collect relevant data and present these data as evidence Therefore POE activities are effective in increasing academic achievement and gaining problem solving skills Forest schools as an alternative and inspirational learning environment are also found in the literature In this model environment which covers a long period of time takes place through play and realizes active and experiential learning students play and discover through play At the end of this process social emotional and physical skills improve The application of this method which mostly accompanies the preschool period at other grade levels is very important for the development of children s confidence self esteem and As can be seen almost all of the studies are aimed at realizing effective and permanent learning raising awareness and developing critical thinking skills In this sense all the studies in this section are attempts written with

the philosophy of doing the best for the child **Current Index to Journals in Education** ,2000 *Assessing Contexts of Learning* Susanne Kuger,Eckhard Klieme,Nina Jude,David Kaplan,2016-12-05 This volume brings together educational effectiveness research and international large scale assessments demonstrating how the two fields can be applied to inspire and improve each other and providing readers direct links to instruments that cover a broad range of topics and have been shown to work in more than 70 countries The book s initial chapters introduce and summarize recent discussions and developments in the conceptualization implementation and evaluation of international large scale context assessments and provide an outlook on possible future developments Subsequently three thematic sections Student Background Outcomes of Education Beyond Achievement and Learning in Schools each present a series of chapters that provide the conceptual background for a wide range of important topics in education research policy and practice Each chapter defines a conceptual framework that relates recent findings in the educational effectiveness research literature to current issues in education policy and practice These frameworks were used to develop interesting and relevant indicators that may be used for meaningful reporting from international assessments other cross cultural research or national studies Using the example of one particular survey the Programme for International Student Assessment PISA 2015 this volume links all theoretical considerations to fully developed questionnaire material that was field trailed and evaluated in questionnaires for students and their parents as well as teachers and principals in their schools The primary purposes of this book are to inform readers about how education effectiveness research and international large scale assessments are already interacting to inform research and policymaking to identify areas where a closer collaboration of both fields or input from other areas could further improve this work to provide sound theoretical frameworks for future work in both fields and finally to relate these theoretical debates to currently available and evaluated material for future context assessments
