Stauffer,2021-08-17 This is the first book to consider the development of all three cultural heritage institutions libraries archives and museums and their interactions with society and culture from ancient history to the present day in Western Europe the United Kingdom and the United States The text explores the social and cultural role of these institutions in the societies that created them as well as the political economic and social influences on their mission philosophy and services

and how those changed throughout time. The work provides a thorough background in the topic for graduate students and professionals in the fields of library and information science, archival studies and museum resource management, preservation and administration. Arranged chronologically, the story begins with the temple libraries of ancient Sumer, followed by the growth and development of governmental and private libraries in ancient Greece and Rome, the influence of Asia and Islam on Western library development, the role of Christianity in the preservation of ancient literature as well as the skills of reading and writing during the Middle Ages, and the coming of the Renaissance and the rise of the university library. It continues by tracing the gradual division between archives and libraries and the growth of governmental and private libraries as independent institutions during and after the Renaissance and through the Enlightenment, and the development of public and private museums from the cabinets of curiosities of private collectors beginning in the 17th century. Individual chapters explore the further growth and development of libraries, archives and museums in the 19th and 20th centuries, exploring the public library and public museum movements of those centuries as well as the rise of the governmental and institutional archive. The final chapter discusses the growing collaboration between and even convergence of these institutions in the 21st century and the impact of modern information technology and makes predictions about the future of all three institutions.

**Byzantine Tree Life** Thomas Arentzen, Virginia Burrus, Glenn Peers, 2021-07-11. This book examines the many ways Byzantines lived with their trees. It takes seriously theological and hagiographic tree engagement as expressions of that culture's deep involvement and even fascination with the arboreal. These pages tap into the current attention paid to plants in a wide range of scholarship, an attention that involves the philosophy of plant life as well as scientific discoveries of how communicative trees may be and how they defend themselves. Considering writings on and images of trees from Late Antiquity and medieval Byzantium sympathetically, the book argues for an arboreal imagination at the root of human aspirations to know and draw close to the divine.
