

Language, thought and culture

9.1 A relationship at the heart of psycholinguistics

The relationship of language, thought, and culture is a topic that is central to psycholinguistics. People throughout the ages have wondered whether speech or language is necessary for thought. No person shall teach any subject to any person in any language other than the English language. Languages other than English may be taught only after a pupil shall have . . . passed the eighth grade. . . . Any person who violates any of the provisions of this act shall be deemed guilty of a misdemeanor and, upon conviction, shall be subject to a fine of not less than twenty-five dollars (\$25), nor more than one hundred dollars (\$100) or be confined in the county jail for any period not exceeding thirty days for each offense.

(US Supreme Court Reports, 1922, pp. 392–403)

Actually not only Nebraska but 21 other states prohibited the teaching of foreign languages. Only so-called 'dead' languages such as Latin and

Cowan,1990 **Thinking and Speaking in Two Languages** Aneta Pavlenko,2011-01-19 Until recently the history of debates about language and thought has been a history of thinking of language in the singular The purpose of this volume is to reverse this trend and to begin unlocking the mysteries surrounding thinking and speaking in bi and multilingual speakers If languages influence the way we think what happens to those who speak more than one language And if they do not how

can we explain the difficulties second language learners experience in mapping new words and structures onto real world referents The contributors to this volume put forth a novel approach to second language learning presenting it as a process that involves conceptual development and restructuring and not simply the mapping of new forms onto pre existing meanings
