,2004 **Europeanization and Statebuilding as Everyday Practices** Vjosa Musliu, 2021-05-17 This book provides a critical understanding of Europeanization and statebuilding in the Western Balkans using the notion of everyday practices This volume argues that it is everyday and mundane events that provide the entry points to showcase a broader set of practices of Europeanization in countries outside the EU It does this by tracing notions of Europeanization in the everyday statebuilding of Kosovo Europe Day celebrations in Bosnia and Herzegovina urban politics in Tirana and space and place making in Skopje In doing so the book shows that everyday events tell us that as much as it is about changing structures institutions and economic models Europeanization is also about changing behaviours and ideas in populations at large At the same time the work shows that countries outside the EU use everyday events to perform their belonging to Europe This book will be of much interest to students of European Studies Balkan politics statebuilding and International Relations generally

Principal-Agent Problems in Public Enterprises in Kosovo Njomeza Zejnullahu,2023-09-12 Doctoral Thesis Dissertation from the year 2018 in the subject Economics Case Scenarios language English abstract Publicly Owned Enterprises POEs in Kosovo are present largely in the market with a focus on sectors such as electricity railways telecommunications waste management etc This presence is followed by the constant need for subsidies from the government and weak financial and commercial performance POEs in Kosovo are faced with numerous challenges including weak governance and management Agency Theory is used widely as a tool with which to explain governance and functioning of organisations and companies In addition Agency Theory is used to explore relations between stakeholders in politics and the economy This study first

elaborates upon the applicability of Principal Agent Theory in POEs in Kosovo and then identifies the presence of principal agent problems and identifies the nexus between such problems and poor performance of POEs Identification of principal agent problems may help to identify the reason for poor performance of POEs and the lack of transparency accountability and supervision POEs are subsidised by the state on an annual basis which makes the identification of problems in having profitable POEs important for public interests too Such importance is due not only to the fact that POEs are financed by taxpayers but also to the fact that they are supposed to provide services in public interests by being self sustainable and profitable for the government as a shareholder The study aims to conclude that principal agent problems such as capture rent seeking moral hazard information asymmetry and adverse selection are present in POEs in Kosovo and that they have a negative impact on their performance Such principal agent problems and their negative performance may also be influenced by gaps in legislation and weak law enforcement

The Battle of Kosovo 1389 Anna di Lellio, 2009-07-15 The Battle of Kosovo of 1389 holds enormous significance in the formation of modern Balkan nation states especially among South Slav and Serbian nationalist circles What has given this single battle such resonance even more than six centuries later and what does it reveal about the complex tangle of identity in the contemporary Balkans Robert Elsie's beautiful new translation brings a little known Albanian epic account of the battle between the Ottoman Sultan Murat I and a coalition of Balkan forces brilliantly to life The fantastic tale of Murat's campaign in Kosovo and his assassination by the Albanian knight Millosh Kopiliq is more often presented from the Serb perspective which extols particularly the valor of the Serbian knight Milos Obilic By proposing an alternative narrative The Battle of Kosovo 1389 offers a more nuanced understanding of this powerful myth of nationalism and belonging Anna Di Lellio's sensitive commentary explores the significance of this epic poem and of the battle more generally in post war Kosovo in reinforcing a collective identity that emphasizes resistance against foreign oppression and identifies strongly with a European predominantly Christian culture The Battle of Kosovo 1389 is an important addition to our understanding of the past present and future of this complex Balkan nation as well as the broader issues of national memory and identity *Nordic journal of Soviet and East European studies*, 1986
