## **Studies Voltaire 18th Century Volume 293:**

**Evolutionism in Eighteenth-century French Thought** Mary Efrosini Gregory, 2008 This book examines how eighteenth century French theorists Maillet Montesquieu La Mettrie Buffon Maupertuis Diderot Rousseau and Voltaire addressed evolutionism Each thinker laid down a building block that would eventually open the door to the mutability of species and a departure from the long held belief that the chain of beings is fixed This book describes how the philosophes established a triune relationship among contemporary scientific discoveries random creationism propelled by the motive and conscious properties of matter and the notion of the chain of being along with its corollaries plenitude and continuity Also addressed is the contemporary debate over whether apes could ever be taught to speak as well as the issue of race and the family of man

**Interpreting Newton** Andrew Janiak, Eric Schliesser, 2012-01-12 Essays by leading scholars on Isaac Newton and his philosophical interlocutors and critics discussing a wide range of topics

**Studies in Eighteenth-century Culture** Timothy Erwin, Julie Candler Hayes, 1998 This volume presents a group of essays that evoke broad contexts and future avenues for work in the field of 18th century studies The contributors take up the question of identity not as a fixed stable property whose boundaries may be confidently mapped but rather as a complex and unpredictable process navigating different discourses and modes of social insertion They address issues that involve national linguistic and cultural affiliations or call into question the relation of gender performance to literary persona

**Ideas of poverty in the Age of Enlightenment** Niall O'Flaherty, Robin Mills, 2024-04-16 This collection of essays examines the ways in which poverty was conceptualised in the social political and religious discourses of eighteenth century Europe It brings together experts with a wide range of expertise to offer pathbreaking discussions of how eighteenth century thinkers thought about the poor Because the theme of poverty played important roles in many critical issues in European history it was central to some of the key debates in Enlightenment political thought throughout the period including the controversies about sovereignty and representation public and private charity as well as questions relating to crime and punishment The book examines some of the most important contributions to these debates while also ranging beyond the canonical Enlightenment thinkers to investigate how poverty was conceptualised in the wider intellectual culture as politicians administrators and pamphlet writers grappled with the issue An electronic edition of this book is freely available under a Creative Commons CC BY NC ND licence
