Early Career Teachers in Higher Education Jody Crutchley, Zaki Nahaboo, Namrata Rao, 2021-08-12 Early Career Teachers in Higher Education explores the experiences of Early Career Teachers ECTs through 13 personal teaching journeys from academics working across Africa Asia Australasia Europe and South America This edited volume contains the subjective narrative of each contributor s entry into academia their pedagogic practice and the development of their multiple teaching identities Their personal narratives and testimonies presented here will provide a valuable resource for ECTs and academics around the world as they begin teaching in higher education In addition this edited book highlights contemporary issues such as precarity casualisation fragmentation of academic responsibilities and intersectionality that shape contemporary ECT workloads *Tracking Early Career Researchers in EFL / ESL Studies* Kırmızı, Özkan, 2025-03-06 Tracking early career researchers in English as a Foreign Language EFL and English as a Second Language ESL studies is essential for understanding the evolving landscape of language acquisition and pedagogy These researchers often at the forefront of innovative methodologies and practices bring fresh perspectives that contribute to the field s growth Tracking their work can identify emerging trends challenges and opportunities and help assess the impact of their contributions on both theoretical frameworks and practical applications in language teaching Continual exploration and monitoring of their progress may shape the future direction of EFL and ESL research ensuring it remains responsive to the needs of learners educators and the broader linguistic community Tracking Early Career Researchers in EFL ESL Studies examines the contextual factors that play a role in identity construction resilience academic stress or career projections of early career researchers It explores the rise of neo liberal educational policies the commodification of education the credentials inflation ranking systems and criteria based promotion policies in higher education process which pressure early career researchers This book covers topics such as digital technology linguistics and qualitative research and is a useful resource for academicians researchers linguists language educators computer engineers and data scientists *Stop Commercializing the Value of Study Abroad: The Lack of an Effect of Study Abroad on Early Career Income of U.S. Graduates* SUZAN KOMMERS, Stop Commercializing the Value of Study Abroad The Lack of an Effect of Study Abroad on Early Career Income of U S Graduates *Examining the Impact of Undergraduate Study Abroad on Early Career Outcomes: A Mixed Methods Approach* Noah Goldblatt, 2019 This study examines impact of study abroad on early career outcomes at a professionally focused northeastern private college A mixed methods sequential research design provides a thorough inquiry into the influence of study abroad on early career outcomes at this institution In the first quantitative phase of the study The National Organization of College and Employer s NACE First Destination Survey data is analyzed to assess whether a study abroad experience has an impact on career outcomes The quantitative results compare career outcomes for 2014 2015 and 2016 graduates who have studied abroad n 523 and those who did not study abroad n 661 The quantitative survey contains 1184

participants and represents a response rate of approximately 90% of the total graduates at the college. The second qualitative phase examines the quantitative results in order to help explain and provide insights into the outcomes. A theoretical lens of appreciative inquiry is applied as a framework for interpreting the results and informs the qualitative line of questioning. In this project, studying abroad did not prove to significantly impact early career outcomes. Based on the NACE First Destination Survey, the higher education industry standard for capturing career placement information, graduates from this college got no quantifiable positive early career impact from studying abroad. In fact, some trends in the data even show an early negative effect from having studied abroad, especially for female graduates. Further trends in the results contradict assumptions about study abroad that are held by students and international educators. However, meaningful impacts of studying abroad on graduates' vocational clarity along with personal and professional development are revealed in the qualitative phase of the study that simply cannot be captured in the NACE survey.

The Untold Story of the Tata Group's Most Ambitious Leadership Development Programme. In the mid 1950s JRD Tata envisioned the creation of an exclusive management cadre for the Tata Group, christened the Tata Administrative Service (TAS). His vision was to create future leaders who would perpetuate the Tata values such as integrity, excellence, unity, and responsibility throughout the Group. At the core of all these values was the agenda of nation building. Understanding fully well that leadership development is a dynamic phenomenon and continues to change over time, JRD was looking at leaders who would be constantly groomed for roles across Tata companies. What led to the TAS becoming a natural choice among aspirants over the Indian Administrative Service (IAS), which at any point of time would give them the assurance of a stable government job? How did the TAS fare with creating leaders? Who were some of the brightest leaders that it created? Where is the TAS today and how does the future look? In Tata's Leadership Experiment, three former TAS officers—Bharat Wakhlu, Mukund Rajan, and Sonu Bhasin—come together to find answers to these and many other pertinent questions. Based on extensive research and detailed interviews with former and current TAS officers, this book presents a fascinating account of an ambitious leadership experiment.
