## **Studying Student Attrition:**

*Studying Student Attrition* Ernest T. Pascarella, 1982-01-01      *Leaving College* Vincent Tinto, 2012-04-27 In this 1994 classic work on student retention Vincent Tinto synthesizes far ranging research on student attrition and on actions institutions can and should take to reduce it The key to effective retention Tinto demonstrates is in a strong commitment to quality education and the building of a strong sense of inclusive educational and social community on campus He applies his theory of student departure to the experiences of minority adult and graduate students and to the situation facing commuting institutions and two year colleges Especially critical to Tinto's model is the central importance of the classroom experience and the role of multiple college communities

**Studying Student Attrition**, 1982      **College Student Attrition and Retention** Leonard Ramist, 1981-01-01 Research on college student attrition and retention is reviewed Overall dropout rates and the reasons students give for dropping out are examined and an attempt is made to assess the outcomes of going straight through college as opposed to dropping out temporarily leaving school and not going to college at all The demographic academic motivational and personal characteristics of students who are likely to drop out are examined along with the effect of the general college environmental factors on persistence College programs designed to upgrade the level of educational service and encourage students to remain in college are described The programs concern pre enrollment information admissions college costs and ways to meet them orientation faculty and student interaction academic programs counseling and advising career development campus activities housing the withdrawal procedure two year colleges and administration of the retention program Students reasons for dropping out include academic matters financial difficulties motivational problems personal considerations dissatisfaction with college military service and full time jobs The evidence indicates that college does make a difference in improvement in self image social maturity interests competence and employment A chart indicates what the last 50 years of retention research have shown about the types of students who are more likely to persist and the types who are less likely to persist An extensive bibliography is included SW

*The Doubters' Dilemma* Mario Daniel Martín, Louise Jansen, Elizabeth Beckmann, 2016-08-02 This book explores the extent and causes of attrition and retention in university Language Culture L C programs through a detailed analysis of an institutional case study at The Australian National University ANU Using extensive data collected through student surveys coupled with data mining of university wide enrolment data the authors explore the enrolment and progress of students in all ANU L C programs Through their detailed statistical analysis of attrition and retention outcomes the authors reveal serious inadequacies in the traditional and common methodology for determining the extent of student attrition and retention in tertiary L C programs Readers are shown why a year to year comparison of students who continue or discontinue language studies using traditional statistical methodology cannot provide data that is sufficiently meaningful to allow for sound policy and decision making The authors instead suggest a more valid replicable methodology that provides a new approach potentially applicable to all disciplines

and all student retention measures The authors also demonstrate that the empirical data supports a new hypothesis for the reasons for attrition based on students relative belief or doubt in their capacity to complete their studies successfully By highlighting the importance of language capital as a factor in students concerns about their capacity for success and hence in their decisions to stay in or leave a university language program the authors show the importance of the doubters dilemma By taking a rigorous approach to hypothesis building and testing around enrolment and attrition data the authors provide valuable insights into attrition issues and potential retention strategies in L C programs which will be relevant to institutions policy makers and teaching academics

College Students and Institutional Fit Jane Margaret Higgins,1998      **A Study on Student Persistence-attrition in Minnesota Technical Institutes** Sherry Anker Schwartz,1989      **A Study of Student Attrition** State University College at Buffalo. Office of Institutional Research,1977      **College Attrition at American Research Universities** Joseph C. Hermanowicz,2003 Hermanowicz asks an important question Why do college student departure rates vary among elite institutions of higher learning in the United States This book breaks new ground as this question has not been previously explored in an empirical way An empirical treatment of this question is important both theoretically and practically This volume makes a substantial contribution to the voluminous body of literature on college student departure

**Research Into Student Attrition in the University Studies and Weekend College Program** Alan Woodley,1979      **"You're Leaving?" Understanding Student Voluntary Attrition from a Private School** Stephan Michael Grasmuck,1998 Concern over student attrition from schools places the issue at the fore of research especially at the university level of education Several studies have investigated this phenomenon toward understanding and improving upon student retention in Universities and Colleges Private secondary and elementary schools particularly in the United States also recognize that student attrition issues raise concerns running to the very core of the existence of such schools In the Canadian context private school administrators can learn from the United States situation so that we may see what lies ahead for Canadian schools We know comparatively little about the issues surrounding student voluntary attrition with respect to private secondary schools From the literature it seems that the forces which shape attrition elsewhere arise from a very complex interplay of issues It appears that the dispositions of the people who enroll the character of their interactions with the institution upon entry and the external forces which influence their behaviour in school all play a role in a student s failure to persist in her or his school Given the apparent complexity of the voluntary attrition process this study employed qualitative research methodology to learn more about the issues involved Twelve student leavers members of their families school friends and teachers provided the data gathered through interviews in this case study approach This research demonstrates that each of the departing students brought with her him at the time of enrolment some personal character traits or issues which affected the ways in which she he interacted with internal characteristics of the school Once enrolled these students experienced problems which adversely affected the students ability to affiliate within the school s culture

Some gender related issues came to the fore External forces also played a role in the unique formula of events leading to each student s failure to persist This research provides a compelling look at the issues underlying the voluntary attrition process for the student leavers involved This study enhances our understanding of private school voluntary attrition and does so from a Canadian perspective

**Institutional Factors and Students Retention** Rafael Alverio,2010 This research was conducted with the intent of analyzing the factors that determine the desertion of students at a school or university In order to simplify the study students that were enrolled in the Airway Science Program that decided to abandon their studies were utilized I could also demonstrate the importance that the educational goals have in the students and how they could be affected by the institutional factors It is the preconception of knowing if the students that decided to abandon the program did it to meet their academic goals or due to some institutional factor or variable that motivated the abandonment The decision of abandoning a university or school affects the student and the institution itself A student that decides to abandon school demonstrates that the quality of the education received does not conform with its expectations The effectiveness of any educational institution is related to student involvement in learning Every institution should accomplish student satisfaction with the services it offers

**Research in Education** ,1970 *How to Recruit and Retain Higher Education Students* Tony Cook,Brian S. Rushton,2009-09-10 *How to Recruit and Retain Higher Education Students* is an invaluable resource for academic staff administrators and policy makers involved in student recruitment and improving student retention It offers practical advice on how universities can influence the expectations of prospective students allowing them to make sensible decisions about careers courses and institutions Many surveys of students who drop out of university show that most do so out of disappointment Failing to understand what higher education was about quickly enough they become confused and frustrated Dropping out seems the best solution This book describes a series of practices proven to encourage students to stay on discussing the background research on student attrition By preparing students better for their higher education experience the practices in this book are effective not only in recruiting students but also in matching them to the right institutions and programmes The practices described range from those reaching out in a broad way to communities of potential students to university support for pre entry examinations to enhanced communication between institutions and applicants All are described in sufficient detail to allow judgments to be made about how to use and adapt them to suit local needs *How to Recruit and Retain Higher Education Students* provides a sound theoretical foundation for research into

student retention and provides the necessary underpinning for those academic staff embarking on courses and assists in preparing them for their roles in both teaching and student support     *A Study of Student Attrition and Retention on a Work-study College Campus* Jean M. Smith,1991     *A Study of Tinto's Model of Student Departure at a Residential, Church-affiliated, Liberal Arts College* Timothy Marcus Beuthin,1989     Student Attrition in Higher Education Jessica Ann York,2012     *Resources in Education* ,1979     **Research in Education** ,1970
