argues that scholarship on the Founding is no longer steered by a single dominant approach or even by a set of questions that control its direction. He also examines the challenges posed to Founding scholarship by this diversity and complexity and the possibilities opened by new avenues of inquiry that have recently emerged. Scholars of the Founding including Louis Hartz, Bernard Bailyn, Gordon Wood, and Garry Wills that best exemplify different schools of interpretation. Gibson focuses on six approaches that have dominated the modern study of the Founding: Progressive, Lockean, liberal, Republican, Scottish Enlightenment, multicultural, and multiple traditions approaches. For each approach he traces its fundamental assumptions, revealing deeper ideological and methodological differences between schools of thought that on the surface seem to differ only about the interpretation of historical facts. While previous accounts have treated the study of the Founding as the sequential replacement of one paradigm by another, Gibson argues that all of these interpretations survive as alternative and still viable approaches. Each has simultaneously illuminated and masked core truths about the American Founding; he renders a balanced account of the current debate over the origins and foundations of the American republic and offers solid footing on the path to understanding the vast literature devoted to this important subject.
