**Negotiation Games** Steven J. Brams, 2003 Steven J Brams is one of the leading game theorists of his generation This new edition includes brand new material on topics such as fallback bargaining and principles of rational negotiation

**Divine Games** Steven J. Brams, 2024-03-12 A game theoretical analysis of interactions between a human being and an omnipotent and omniscient godlike being highlights the inherent unknowability of the latter's superiority In Divine Games Steven Brams analyzes games that a human being might play with an omnipotent and omniscient godlike being Drawing on game theory and his own theory of moves Brams combines the analysis of thorny theological questions suggested by Pascal's wager which considers the rewards and penalties associated with belief or nonbelief in God and Newcomb's problem in which a godlike being has near omniscience with the analysis of several stories from the Hebrew Bible Almost all of these stories involve conflict between God or a surrogate and a human player their representation as games raises fundamental questions about God's superiority In some games God appears vulnerable after Adam and Eve eat the forbidden fruit in defiance of His command in other games his actions seem morally dubious when He subjects Abraham and Job to extreme tests of their faith and in still other games He has a propensity to hold grudges in preventing Moses from entering the Promised Land and in undermining the kingship of Saul If the behavior of a superior being is indistinguishable from that of an ordinary human being his existence would appear undecidable or inherently unknowable Consequently Brams argues that keeping an open mind about the existence of a superior being is an appropriate theological stance
