

A close-up photograph of a man and a woman. The man, on the left, is wearing a dark flat cap and aviator sunglasses, looking directly at the camera with a neutral expression. The woman, on the right, is wearing a patterned headscarf and a denim jacket, smiling warmly at the camera. They appear to be outdoors in a city setting, with a blurred background of buildings.

Western Europe's

Democratic Age Martin Conway,2022-06-14 A major new history of how democracy became the dominant political force in Europe in the second half of the twentieth century What happened in the years following World War II to create a democratic revolution in the western half of Europe In Western Europe's Democratic Age Martin Conway provides an innovative new account of how a stable durable and remarkably uniform model of parliamentary democracy emerged in Western Europe and how this democratic ascendancy held fast until the latter decades of the twentieth century Drawing on a wide range of sources Conway describes how Western Europe's postwar democratic order was built by elite intellectual and popular forces Much more than the consequence of the defeat of fascism and the rejection of Communism this democratic order rested on universal male and female suffrage but also on new forms of state authority and new political forces primarily Christian and social democratic that espoused democratic values Above all it gained the support of the people for whom democracy provided a new model of citizenship that reflected the aspirations of a more prosperous society This democratic order did not however endure Its hierarchies of class gender and race which initially gave it its strength as well as the strains of decolonization and social change led to an explosion of demands for greater democratic freedoms in the 1960s and to the much more contested democratic politics of Europe in the late twentieth century Western Europe's Democratic Age is a compelling history that sheds new light not only on the past of European democracy but also on the unresolved question of its future

French Intellectuals Against the Left Michael Scott Christofferson,2004 Christofferson argues that French anti-totalitarianism was the culmination of direct democratic critiques of communism revisions of the revolutionary project after 1956 He offers an alternative interpretation for the denunciation of communism Marxism by the French intellectual left in the late 1970s

Threatened Masculinity from British Fiction to Cold War German Cinema Joseph Willis,2019-05-30 The impact of the Cold War on German male identities can be seen in the nation's cinematic search for a masculine paradigm that rejected the fate centered value system of its National Socialist past while also recognizing that

German males once again had become victims of fate and fatalism but now within the value system of the Soviet and American hegemonies that determined the fate of Cold War Germany and Central Europe This monograph is the first to demonstrate that this Cold War cinematic search sought out a meaningful masculine paradigm through film adaptations of late Victorian and Edwardian male writers who likewise sought a means of self determination within a hegemonic structure that often left few opportunities for personal agency In contrast to the scholarly practice of exploring categories of modern masculinity such as Victorian imperialist manliness or German Cold War male identity as distinct from each other this monograph offers an important comparative corrective that brings forward an extremely influential century long trajectory of threatened masculinity For German Cold War masculinity lessons were to be learned from history namely from late Victorian and Edwardian models of manliness Cold War Germans like the Victorians before them had to confront the unknowns of a new world without fear or hesitation In a Cold War mentality where nuclear technology and geographic distance had trumped face to face confrontation between East and West Cold War German masculinity sought alternatives to the insanity of mutual nuclear destruction by choosing not just to confront threats but to resolve threats directly through personal agency and self determination

Genealogical chronology of the world before Christ, ed. by K.A. McMurdo Albert Welles,1889 *The Age of Reason; Being an Investigation of True and Fabulous Theology, Etc* Thomas Paine,1870 **Saving Nature Under Socialism** Julia E. Ault,2021-09-09 When East Germany collapsed in 1989 1990 outside observers were shocked to learn the extent of environmental devastation that existed there The communist dictatorship however had sought to confront environmental issues since at least the 1960s Through an analysis of official and oppositional sources Saving Nature Under Socialism complicates attitudes toward the environment in East Germany by tracing both domestic and transnational engagement with nature and pollution The communist dictatorship limited opportunities for protest so officials and activists looked abroad to countries such as Poland and West Germany for inspiration and support Julia Ault outlines the evolution of environmental policy and protest in East Germany and shows how East Germans responded to local degradation as well as to

an international moment of environmental reckoning in the 1970s and 1980s The example of East Germany thus challenges and broadens our understanding of the greening of post war Europe and illuminates a larger central European understanding of connection across the Iron Curtain *Reassessing the Paradigm of Economics* Valeria Mosini,2011-07-28 When President Reagan and Prime Minister Thatcher adopted the neoliberal doctrine as the paradigm of economics there was no evidence that the move would have been successful but thirty years on the recurrent crises that culminated in 2008 suggest a serious mis match between expectations and outcomes a re examination of the paradigm is in order This book focuses on Milton Friedman s formulation of the neoliberal doctrine and analyses two aspects that were essential to turning it into a fully fledged paradigm the attribution of scientific status to positive economics which led to informing public policies on the requirements of the market and the characterisation of economic freedom as capable of promoting political freedom which led to identifying free market with democracy The book exposes Friedman s methodological argument for attributing positive economics scientific status as a failure and his characterisation of economic freedom as a delusion it identifies in the emergence as the mainstream in economics of the neoclassical synthesis which borrowed from Walras the mathematical treatment of equilibrium but not the ethical and social framework in which it was inscribed a development that facilitated the transition from the Keynesian to the neoliberal paradigm Dr Mosini shows that the gigantic bail outs carried out courtesy of the public purse which institutionalised the practice of collectivising losses while keeping profits private were no accident but the consequence of the rethinking of the function of lender of last resort according to Friedman s conception of rationality in relation to risk combined with his interpretation of the 1930s recession The book concludes that the neoliberal paradigm has served the interests of the economically powerful social strata it was designed to benefit extremely well but that the deep and deepening injustice it has brought about calls for a complete rethinking of the paradigm of economics according to ethical principles respectful of human values This book should be of interest to students and researchers of Political Economy Economic Methodology History of Economic Thought and Philosophy *Spiritual Reflections for Every Day in the Year: with Morning and Evening Prayers* Thomas Goyder,1849 *A Compendium of the Theological Writings of Emanuel Swedenborg* Emanuel Swedenborg, Samuel Mills Warren,1885 *Peloubet's Select Notes on the International Bible Lessons for Christian Living* ,1890 ***Cyclopaedia of Biblical, Theological, and Ecclesiastical Literature*** John McClintock,1883 ***Studies in the Scriptures: The plan of ages*** ,1886 *Littell's Living Age* ,1892 ***The Poster*** ,1900
