**Technical Report - Jet Propulsion Laboratory, California Institute of Technology** Jet Propulsion Laboratory (U.S.),1967      **The New Encyclopædia Britannica: Macropædia** ,1993 This encyclopedia includes a two volume index a 12 volume Micropaedia Ready reference a 17 volume Macropaedia Knowledge in depth and the Propaedia      **The Case for Mars** Robert Zubrin,Richard Wagner,2011-06-28 He explains step by step how we can use present day technology to send humans to Mars within ten years actually produce fuel and oxygen on the planet s surface with Martian natural resources how we can build bases and settlements and how we can one day terraform Mars a process that can alter the atmosphere of planets and pave the way for sustainable life Under Dr Zubrin s program a human mission is only the first step toward a day when research bases and eventual colonies can be developed on Mars surface Mars possesses enormous chemical and mineral resources all of which can be put to use in pursuit of travel exploration structures and a variety of human activities on a planet that is neither as harsh nor as unreachable as we popularly believe The Case For Mars is not a vision for the far future or one that will cost us impossible billions It is a plan that can be put into action today if we are willing to rethink our traditional methods and costs      Mars Hugh H. Kieffer,1992-10 The planet Mars has been a subject of wonder for millennia as attested by its place in mythology by later speculation about its canals and by the scientific and public excitement over the Viking mission Although the scientific literature about the planet is voluminous no comprehensive treatment of the results of modern spacecraft exploration has yet been made available This volume fills that gap by providing a summary of what is presently known about Mars and identifying many puzzles such as polar cap variance occurrence of dust storms and the possible location of water The introductory chapter cites questions controversies and milestones in the study of Mars and also includes an annotated book list basic data about the planet and a guide to Martian seasons A chapter on telescopic observation credits the contributions made by many amateurs that have advanced our knowledge of variations observed on Mars A chapter on spacecraft exploration by an American and a Russian author who have participated in all Mars missions includes a revelation of an additional Soviet attempt Twenty nine technical articles cover geophysics bedrock geology surface atmosphere exosphere and magnetic field and climate history Two chapters address the search for life on Mars three concluding chapters consider the Martian satellites An indispensable reference for scientists Mars will also serve as a complete sourcebook for serious amateur astronomers      **Routledge Handbook of International Law and the Humanities** Shane Chalmers,Sundhya Pahuja,2021-05-19 This Handbook brings together 40 of the world s leading scholars and rising stars who study international law from disciplines in the humanities from history to literature philosophy to the visual arts to showcase the distinctive contributions that this field has made to the study of international law over the past two decades Including authors from Australia Canada Europe India South Africa the UK and the USA all the contributors engage the question of what is distinctive and critical about the work that has been done and that continues to be done in the

field of international law and the humanities For many of these authors answering this question involves reflecting on the work they themselves have been contributing to this path breaking field since its inception at the end of the twentieth century For others it involves offering models of the new work they are carrying out or else reflecting on the future directions of a field that has now taken its place as one of the most important sites for the study of international legal practice and theory Each of the book s six parts foregrounds a different element or cluster of elements of international law and the humanities from an attention to the office conduct and training of the jurist and jurisprudent Part 1 to scholarly craft and technique Part 2 to questions of authority and responsibility Part 3 history and historiography Part 4 plurality and community Part 5 as well as the challenge of thinking and rethinking international legal concepts for our times Part 6 Outlining new ways of imagining and doing international law at a moment in time when original critical thought and practice is more necessary than ever this Handbook will be essential for scholars students and practitioners in international law international relations as well as in law and the humanities more generally **The New Encyclopaedia Britannica** ,1987
