The Incorporative Consciousness of

Robert Bly Victoria Frenkel Harris, 1992 Victoria Frenkel Harris traces the aesthetic journey of poet Robert Bly from his early structured works of mystical imagery and lyrical landscapes to his recent explorations of intimate relationships and male socialization Examining the various ways Bly's prose poems articulate his opposition to the Vietnam War and his recent writings manipulate more formal patterns in detailing the intricacies of human relationships Harris labels this evolution in form subject and imagery the incorporative consciousness incorporative because it assimilates Jungian psychological categories international poetic traditions and a compelling breadth of topics Harris relies in part on contemporary feminist theory to throw revealing new light on Bly's recent works Though sympathetic to Bly Harris finds that in spite of his affirmation of the interaction of psychic creative and intellectual energies in both sexes the poet's later erotic poems tend to objectify women in counterproductive ways Bly's idealization of woman as a Jungian universal Harris contends can blind him toward actual women Harris is at her best as she delimits with balance and precision the full complexity of the poet's work

Back from the Far Field Bernard W. Quetchenbach, 2000 Many poets writing after World War II have found the individual focus of contemporary poetics poorly suited to making statements directed at public issues and public ethics The desire to invest such individualized poetry with greater cultural authority presented difficulties for Vietnam protest poets for example and it has been a particular challenge for nature writers in the Thoreau tradition who have attempted to serve as advocates for the natural world Examining the implications of this dilemma Bernard W. Quetchenbach locates the poets Robert Bly Gary Snyder and Wendell Berry within two traditions the American nature writing tradition and the newer tradition of contemporary poetics He compares the work of two other twentieth century poets Robinson Jeffers and Theodore Roethke to illustrate how the contemporary shift toward a poetics focused on the poet's life has affected portrayals of nature and the public voice in poetry Turning back to the work of Bly Snyder and Berry Quetchenbach assesses their attempts to reinvent the public voice in the context of contemporary poetics and what effect these attempts have had on their work He argues that these poets have learned from their postwar generation techniques for adapting a personalized poetics to environmental advocacy In addition to modifying what critics have called the poetics of immediacy these poets have augmented their poetic output with prose and identified themselves with long standing traditions of poetic ethical and spiritual authority In doing so Bly Snyder and Berry have attempted to solve not only a problem inherent in contemporary poetics but also the larger problem of the role of the poet in a society that does not recognize poetry While it would be an overstatement to suggest that these three figures have found a place for the poet in American life they have reached audiences that extend beyond traditional readers of poetry At the end of the twentieth century Quetchenbach concludes poets have begun to identify and

direct their writing to specific audiences defined less by aesthetic preferences and more by a shared interest in and dedication to the work's subject matter. Whether revealing a disturbing trend for poetry or an encouraging one for environmentalism and other political causes, it is one of many provocative conclusions. Quetchenbach draws from his examination of postwar nature poetry.

The Morning Glory Robert Bly, 1970 **Encyclopedia of American Poetry: The Twentieth Century** Eric L. Haralson, 2014-01-21

The Encyclopedia of American Poetry: The Twentieth Century contains over 400 entries that treat a broad range of individual poets and poems along with many articles devoted to topics, schools, or periods of American verse in the century. Entries fall into three main categories: poet entries which provide biographical and cultural contexts for the author's career; entries on individual works which offer closer explication of the most resonant poems in the 20th-century canon; and topical entries which offer analyses of a given period of literary production, school, thematically constructed category, or other verse tradition that historically has been in dialogue with the poetry of the United States.

American Poetry, 1989 **Seamus Heaney and American Poetry** Christopher Lavery, 2022-05-09

This book examines the influence of American poetry on Seamus Heaney's achievement by close attention to the themes, style, and resonances of his poetry at different stages of his career, including his appointments in Berkeley and Harvard. Beginning with an examination of Heaney's education at Queen's University, this study presents comparative close readings which explore the influence of five American poets he read during this period: Robert Frost, John Crowe Ransom, Theodore Roethke, Robert Lowell, and Elizabeth Bishop. Lavery demonstrates how Heaney returned to several of these poets in response to difficulty and to consolidate later aesthetic developments. Heaney's ambivalent critical treatment of Sylvia Plath is investigated as is his partial misreading of Bishop, who is understood today more sensitively than in her lifetime. This study also probes the reasons for his elision of other prominent American writers, making this the first comprehensive assessment of American influence on Heaney's poetry.
