**Young EU Migrants in London in the Transition to Brexit** Aija Lulle, Laura Moroșanu, Russell King, 2022-08-09

London has long been a magnet for migrants millions of whom have been attracted by its economic educational and cultural roles as a truly global city. This book examines recent European migration to the London region through the narrated experiences of a large number of younger migrants from old and new EU member states of varying educational and skill backgrounds. The research opens multiple windows into the lives of young EU migrants from six different countries before and after the 2016 Referendum on Brexit. A key concept which lies at the core of the analysis is the interrelationship between geographical mobility and the youth transition to adulthood. Among the dimensions documented are study and employment trajectories, housing and social inclusion, identity and belonging and transnational ties. By paying attention to young people's own accounts of their mobile lives the research pushes the boundaries of traditional understandings of youth transitions and life paths. As an indispensable account of young EU migrants during the Brexit process the book will appeal to undergraduate and postgraduate students across the social sciences especially those interested in migration, youth studies and European studies as well as researchers and policy makers.

**Brazilian Sign Language Studies** Ronice Müller de

Quadros, 2020-08-10 This book brings together a collection of studies on Brazilian Sign Language Libras. Research on Libras began in earnest 20 years ago around the time that Libras was recognised as a national language of Brazil in 2002. Over the years more and more deaf researchers have become sign language linguists and the community of Libras scholars have documented this language and built robust resources for linguistic research. This book provides a selection of studies by these scholars representing work in a variety of areas from phonology to creative literature.

**Youth Labor in Transition**

Jacqueline O'Reilly, Janine Leschke, Renate Ortlieb, Martin Seeleib-Kaiser, Paola Villa, 2018-11-07 Exacerbated by the Great Recession, youth transitions to employment and adulthood have become increasingly protracted, precarious and differentiated by gender, ethnicity and socioeconomic status. Youth Labor in Transition examines young people's integration into employment alongside the decisions and consequences of migrating to find work and later returning home. The authors identify key policy challenges for the future related to NEETS, overeducation, self-employment and ethnic differences in outcomes. This illustrates the need to encompass a wider understanding of youth employment and job insecurity by including an analysis of economic production and how it relates to social reproduction of labor if policy intervention is to be effective. The mapping and extensive analysis in this book are the result of a 3 year European Union funded research project Strategic Transitions for Youth Labour in Europe or STYLE <http://www.style-research.eu> coordinated by Jacqueline O'Reilly. With an

overall budget of just under 5 million euros and involving 25 research partners an international advisory network and local advisory boards of employers unions and policymakers and non governmental organizations from more than 20 European countries STYLE is one of the largest European Commission funded research projects to exist on this topic Consequently this book will appeal to an array of audiences including academic and policy researchers in sociology political science economics management studies and more particular labor market and social policy policy communities and bachelor s and master s level students in courses on European studies or any of the aforementioned subject areas
