Studies in Third World Development M. Francis Abraham, Ramayyar Subramanian, 1992 Contributed articles

**Understanding Development** John Rapley, 2013-02-01 First published in 1997 An introduction to the theory and practices of development in the third world tracing the evolution of development theory over 40 years and examining why so many of the benefits of development are still not shared by millions      International Handbook of Comparative Education Robert Cowen, Andreas M. Kazamias, 2009-08-22 A big project like this Handbook means that you incur debts and not only to your authors and your publisher As editors we along with our colleague Elaine Unterhalter who edited the section on postcolonialism would like to thank most warmly those authors who delivered on time and who did not fuss but just got on and did a r rate job We would also like to thank all authors who did deliver which was almost everyone we asked We know that some of our authors worked in very dif cult private circumstances as they were nishing their chapters and we hope the publication of the Volumes will later be for them a happy reminder of dif culties and disasters overcome The only sad theme is that some very close colleagues with whom we were wo ing and for whom we had the greatest respect and liking became very ill and died while the volumes were being prepared We decided to ask for copyright permissions to publish something of theirs These permissions were graciously given by two major journals and with the agreement also of our publishers Springer Rolland Paulston and Terry McLaughlin have examples of their writing in this Handbook      Education and Development in the Third World Richard D'Aeth, 1975      **Encountering Development** Arturo Escobar, 2011-10-10 How did the industrialized nations of North America and Europe come to be seen as the appropriate models for post World War II societies in Asia Africa and Latin America How did the postwar discourse on development actually create the so called Third World And what will happen when development ideology collapses To answer these questions Arturo Escobar shows how development policies became mechanisms of control that were just as pervasive and effective as their colonial counterparts The development apparatus generated categories powerful enough to shape the thinking even of its occasional critics while poverty and hunger became widespread Development was not even partially deconstructed until the 1980s when new tools for analyzing the representation of social reality were applied to specific Third World cases Here Escobar deploys these new techniques in a provocative analysis of development discourse and practice in general concluding with a discussion of alternative visions for a postdevelopment era Escobar emphasizes the role of economists in development discourse his case study of Colombia demonstrates that the economization of food resulted in ambitious plans and more hunger To depict the production of knowledge and power in other development fields the author shows how peasants women and nature became objects of knowledge and targets of power under the gaze of experts In a substantial new introduction Escobar reviews debates on globalization and postdevelopment since the book s original publication in 1995 and argues that the concept of postdevelopment needs to be redefined to meet today s significantly new conditions He then calls for the development of a

field of pluriversal studies which he illustrates with examples from recent Latin American movements

**Development And Democracy In The Third World** Abbas Pourgerami,1991-10-17 In this original study Abbas Pourgerami provides a comprehensive analysis of economic development and its relationship to political democracy Evaluating statistical associations among social economic and political performance variables of 104 Third World countries Pourgerami determines the prospects for democracy in the developing world He demonstrates that economic well being and political liberty are mutually reinforcing processes challenging the traditional notion that economic progress necessitates sacrifices to democratic government

**Economic Development in the Third World** Michael P. Todaro,1989 This best selling text offers a unique policy oriented approach that uses models and concepts to illustrate real world development problems Retaining its hallmark accessibility throughout the Eighth Edition uses the most current data offering full coverage of recent advances in the field and featuring a balanced presentation of opposing viewpoints on today s major policy debates Economic Development includes extensive country specific examples with particular attention given to economic dislocations throughout Asia Russia and Brazil Updated Country Case Studies and Comparative Case Studies allow students to apply concepts to specific developing nations

**Diem's Final Failure** Philip E. Catton,2002 Catton treats the Diem government on its own terms rather than as an appendage of American policy Focusing on the decade from Dien Bien Phu to Diem s assassination in 1963 he examines the Vietnamese leader s nation building and reform efforts particularly his Strategic Hamlet Program which sought to separate guerrilla insurgents from the peasantry and build grassroots support for his regime Catton s evaluation of the collapse of that program offers

fresh insights into both Diem's limitations as a leader and the ideological and organizational weaknesses of his government while his assessment of the evolution of Washington's relations with Saigon provides new insight into America's growing involvement in the Vietnamese civil war

**Nontimber Forest Products in the United States** Eric T. Jones, Rebecca Jean McLain, James F. Weigand, 2002 A quiet revolution is taking place in America's forests Once seen primarily as stands of timber our woodlands are now prized as a rich source of a wide range of commodities from wild mushrooms and maple sugar to hundreds of medicinal plants whose uses have only begun to be fully realized Now as timber harvesting becomes more mechanized and requires less labor the image of the lumberjack is being replaced by that of the forager This book provides the first comprehensive examination of nontimber forest products NTFPs in the United States illustrating their diverse importance describing the people who harvest them and outlining the steps that are being taken to ensure access to them As the first extensive national overview of NTFP policy and management specific to the United States it brings together research from numerous disciplines and analytical perspectives such as economics mycology history ecology law entomology forestry geography and anthropology in order to provide a cohesive picture of the current and potential role of NTFPs The contributors review the state of scientific knowledge of NTFPs by offering a survey of commercial and noncommercial products an overview of uses and users and discussions of sustainable management issues associated with ecology cultural traditions forest policy and commerce They examine some of the major social economic and biological benefits of NTFPs while also addressing the potential negative consequences of NTFP harvesting on forest ecosystems and on NTFP species populations Within this wealth of information are rich accounts of NTFP use drawn from all parts of the American landscape from the Pacific Northwest to the Caribbean From honey production to a review of nontimber forest economies still active in the United States such as the Ojibway harvest of plants recounted here the book takes in the whole breadth of recent NTFP issues including ecological concerns associated with the expansion of NTFP markets and NTFP tenure issues on federally managed lands No other volume offers such a comprehensive overview of NTFPs in North America By examining all aspects of these products it contributes to the development of more sophisticated policy and management frameworks for not only ensuring their ongoing use but also protecting the future of our forests
