**The Social Construction of Meaning** John Yandell,2013-09-27 This book takes a fresh look at secondary urban English classrooms and at what happens when students and their teachers explore literature collaboratively By closely examining what happens in English lessons minute by minute it reveals how literary texts function not as a valorised heritage to be transmitted but as a resource for the students work of cultural production and contestation The reading that is undertaken in classrooms has tended to be construed as either a poor substitute or merely a preparation for other reading particularly for that paradigmatic literacy event the absorbed and simultaneously discriminating consumption of the literary text by the independent private reader This book argues for a different understanding of what constitutes reading an understanding that is informed by historical and ethnographic perspectives and by psychological and semiotic theory It presents the case for a conception of reading as an active collaborative process of meaning making and for a fully social model of learning Drawing extensively on data gathered through classroom observation and filming of English lessons taught over the course of a year by two teachers in a London secondary school the book explores students engagement with literary texts and the pedagogy that facilitates this engagement The book offers new insights into reading and reading literature in particular It challenges the paradigm of reading that is offered in government policy and the assumption common to much work within the field of new literacies that schooled literacy is the already known the default against which the alternative literacy practices of homes and communities can be defined It will be valuable reading for researchers teachers teacher educators and postgraduate students and will have particular appeal for those with an interest in the fields of English studies and literacy

**Routledge Handbook of Interpretive Political Science** Mark Bevir,R. A. W. Rhodes,2015-07-03 Interpretive political science focuses on the meanings that shape actions and institutions and the ways in which they do so This Handbook explores the implications of interpretive theory for the study of politics It provides the first definitive survey of the field edited by two of its pioneers Written by leading scholars from a range of disciplinary backgrounds the Handbook's 32 chapters are split into five parts which explore the contrast between interpretive theory and mainstream political science the main forms of interpretive theory and the theoretical concepts associated with interpretive political science the methods used by interpretive political scientists the insights provided by interpretive political science on empirical topics the implications of interpretive political science for professional practices such as policy analysis planning accountancy and public health With an emphasis on the applications of interpretive political science to a range of topics and disciplines this Handbook is an invaluable resource for students scholars and practitioners in the areas of international relations comparative politics political sociology political psychology and public administration

**Legislation at Westminster** Meg Russell,Daniel Gover,2017-09-01 The Westminster parliament is a highly visible political institution and one of its core functions is approving new laws Yet Britain's legislative process is often seen as executive dominated and parliament as relatively weak As this book shows such impressions can be misleading Drawing on the largest study of its kind for more than forty years Meg Russell and Daniel Gover cast new light on the political dynamics that shape the legislative process They provide a fascinating account of the passage of twelve government bills collectively attracting more than 4000 proposed amendments through both the House of Commons and House of Lords These include highly contested changes such as Labour's identity cards scheme and the coalition's welfare reforms alongside other relatively uncontroversial measures As well as studying the parliamentary record and amendments the study draws from more than 100 interviews with legislative insiders Following introductory chapters about the Westminster legislative process the book focuses on the contribution of distinct parliamentary actors including the government opposition backbenchers select committees and pressure groups It considers their behaviour in the legislative process what they seek to achieve and crucially how they influence policy decisions The final chapter reflects on Westminster's influence overall showing this to be far greater than commonly assumed Parliamentary influence is asserted in various different ways ranging from visible amendments to more subtle means of changing government's behaviour The book's findings make an important contribution to understanding both British politics and the dynamics of legislative bodies more broadly Its readability and relevance will appeal to both specialists and general readers with interests in politics and law in the UK and beyond

**gradient nonlinearity calibration and correction for a compact** - Feb 14 2023

web dec 29 2016 1 introduction conventional magnetic resonance imaging mri reconstruction methods based on direct fast fourier transform implicitly assume that the spatial encoding gradient fields employed for mr signal formation and data acquisition are perfectly linear throughout the entire imaging volume glover and pelc 1986

mapping the impact of nonlinear gradient fields with noise on - Jun 06 2022

web may 1 2023 here we investigate the impact of gradient nonlinearity correction in the presence of noise we introduced empirically derived gradient nonlinear fields at different signal to noise ratio snr levels in two experiments tensor

**gradient nonlinearity calibration and correction for a compact** - Oct 10 2022

web dec 29 2016 due to engineering limitations the spatial encoding gradient fields in conventional magnetic resonance imaging cannot be perfectly linear and always contain higher order nonlinear components if ignored during image reconstruction gradient nonlinearity gnl manifests as image geometric distortion

**integrated image reconstruction and gradient nonlinearity correction** - Apr 16 2023

web oct 8 2014 to describe a model based reconstruction strategy for routine magnetic resonance imaging that accounts for gradient nonlinearity gnl during rather than after transformation to the image domain and demonstrate that this approach reduces the spatial resolution loss that occurs during strictly image domain gnl correction

**relationship between imaging parameters and distortion in magnetic** - Mar 03 2022

web nov 17 2023 1 introduction the gamma knife a stereotactic irradiation sti device is used to treat metastatic brain tumors auditory nerve tumors and cerebral artery malformations 1 3 computed tomography ct and magnetic resonance imaging mri are performed to determine the irradiated area for sti treatment generally the range of

*magnetic resonance imaging with nonlinear gradient fields signal* - Jun 18 2023

web this text deals with a radically new approach of image encoding the fundamental principle of gradient linearity is challenged by investigating the possibilities of acquiring anatomical images with the help of nonlinear gradient fields

**the role of nonlinear gradients in parallel imaging a k space** - Aug 08 2022

web sep 26 2012 more recently researchers have begun to show the utility of hybrid phase encoded projection imaging methods such as four dimensional 4d rio where the initial phase on each projection changes with each readout and cognac in which nonlinear spatial encoding magnetic fields seems are played as phase encodes while linear

**real time magnetic resonance imaging radial gradient echo** - Sep 09 2022

web real time magnetic resonance imaging radial gradient echo sequences with nonlinear inverse reconstruction real time gradient echo mri with extreme radial undersampling and nonlinear inverse reconstruction allows for direct monitoring of

arbitrary physiological processes and body functions

real time magnetic resonance imaging radial gradient echo - Apr 04 2022

web dec 1 2019 real time gradient echo mri with extreme radial undersampling and nonlinear inverse reconstruction allows for direct monitoring of arbitrary physiological processes and body functions in a variety of clinical scenarios

**real time magnetic resonance imaging in pediatric radiology** - May 05 2022

web feb 10 2021 the recent development of highly undersampled radial gradient echo sequences in combination with nonlinear inverse image reconstruction now allows for mri examinations in real time image acquisition times as short as 20 ms yield mri videos with rates of up to 50 frames per second with spin density t1 and t2 type contrast

**magnetic resonance imaging with nonlinear gradient fields** - Dec 12 2022

web monoplanar gradient system for imaging with nonlinear rotating frame gradient fields for magnetic resonance tomographic imaging using the nonlinear response of gradient nonlinearity calibration and correction for a magnetic resonance imaging chemistry libretexts magnetic particle imaging mit opencourseware magnetic resonance

**mapping the impact of nonlinear gradient fields with noise on** - Nov 11 2022

web may 1 2023 diffusion weighted magnetic resonance mr imaging dw mri provides image contrast determined by brownian motion of water protons and has been increasingly used as biomarkers 1 to study acute ischemic stroke 2 brain trauma 3 multiple sclerosis 4 schizophrenia 5 or alzheimer s disease 6
