Changing Urban Education Clarence Nathan Stone,1998 With critical issues like desegregation and funding facing our schools dissatisfaction with public education has reached a new high Teachers decry inadequate resources while critics claim educators are more concerned with job security than effective teaching Though urban education has reached crisis proportions contending players have difficulty agreeing on a common program of action This book tells why Changing Urban Education confronts the prevailing naivete in school reform by examining the factors that shape reinforce or undermine reform efforts Edited by one of the nation s leading urban scholars it examines forces for change and resistance in urban education and proposes that the barrier to reform can only be overcome by understanding how schools fit into the broader political contexts of their cities Much of the problem with our schools lies with the reluctance of educators to recognize the profoundly political character of public education The contributors show how urban political contexts vary widely with factors like racial composition the role of the teachers union and relations between cities and surrounding metropolitan areas Presenting case studies of original field research in Baltimore Chicago Houston and six other urban areas they consider how resistance to desegregation and the concentration of the poor in central urban areas affect education and they suggest how cities can build support for reform through the involvement of business and other community players By demonstrating the complex interrelationship between urban education and politics this book shows schools to be not just places for educating children but also major employers and large spenders of tax dollars It also introduces the concept of civic capacity the ability of educators and non educators to work together on common goals and suggests that this key issue must be addressed before education can be improved Changing Urban Education makes it clear to educators that the outcome of reform efforts depends heavily on their political context as it reminds political scientists that education is a major part of the urban mix While its prognosis is not entirely optimistic it sets forth important guidelines that cannot be ignored if our schools are to successfully prepare children for the future **Text to Note** Alex Adkins,1983 **The Everything Guide to Study Skills**

native religious beliefs patriotic indoctrinations suppression of tribal languages Victorian gender rituals football contests and industrial training Especially poignant is Adams's description of the ways in which students resisted or accommodated themselves to forced assimilation Many converted to varying degrees but others plotted escapes committed arson and devised ingenious strategies of passive resistance Adams also argues that many of those who seemingly cooperated with the system were more than passive players in this drama that the response of accommodation was not synonymous with cultural surrender This is especially apparent in his analysis of students who returned to the reservation He reveals the various ways in which graduates struggled to make sense of their lives and selectively drew upon their school experience in negotiating personal and tribal survival in a world increasingly dominated by white men The discussion comes full circle when Adams reviews the government's gradual retreat from the assimilationist vision Partly because of persistent student resistance but also partly because of a complex and sometimes contradictory set of progressive humanitarian and racist motivations policymakers did eventually come to view boarding schools less enthusiastically Based upon extensive use of government archives Indian and teacher autobiographies and school newspapers Adams's moving account is essential reading for scholars and general readers alike interested in Western history Native American studies American race relations education history and multiculturalism

Modern Methods in High School Teaching Harl Roy Douglass, 1926 This volume addresses teachers and principals presenting a comprehensive treatment of the methods of teaching in high schools The author assumes a familiarity on the part of his readers with the nature of the learning process adolescence and the psychological foundations of interests and motives as they relate to whole hearted pupil activity The fundamentals of both theory and practice are set forth and an attempt has been made to outline and describe the newer types of procedure which are being employed in different subjects in the best secondary schools Throughout the volume the attempt has been made clearly to represent practices rather than to advocate their adoption The reader is permitted to draw his own conclusions The book will appeal to the type of reader who wants to be intelligent about what is going on in high school teaching
