Study Of Education Volume 1 Early Modern:

The School of Montaigne in Early Modern Europe Warren Boutcher, 2017-03-09 This major two volume study offers an interdisciplinary analysis of Montaigne's *Essais* and their fortunes in early modern Europe and the modern western university Volume one focuses on contexts from within Montaigne's own milieu and on the ways in which his book made him a patron author or instant classic in the eyes of his editor Marie de Gournay and his promoter Justus Lipsius Volume two focuses on the reader writers across Europe who used the *Essais* to make their own works from corrected editions and translations in print to life writing and personal records in manuscript The two volumes work together to offer a new picture of the book's significance in literary and intellectual history Montaigne's is now usually understood to be the school of late humanism or of Pyrrhonian scepticism This study argues that the school of Montaigne potentially included everyone in early modern Europe with occasion and means to read and write for themselves and for their friends and family unconstrained by an official function or scholastic institution For the *Essais* were shaped by a battle that had intensified since the Reformation and that would continue through to the pre Enlightenment period It was a battle to regulate the educated individual's judgement in reading and acting upon the two books bequeathed by God to man The book of scriptures and the book of nature were becoming more accessible through print and manuscript cultures But at the same time that access was being mediated more intensively by teachers such as clerics and humanists by censors and institutions by learned authors of past and present and by commentaries and glosses upon those authors Montaigne enfranchised the unofficial reader writer with liberties of judgement offered and taken in the specific historical conditions of his era The study draws on new ways of approaching literary history through the history of the book and of reading The *Essais* are treated as a mobile transnational work that travelled from Bordeaux to Paris and beyond to markets in other countries from England and Switzerland to Italy and the Low Countries Close analysis of editions paratexts translations and annotated copies is informed by a distinct concept of the social context of a text The concept is derived from anthropologist Alfred Gell's notion of the art nexus the specific types of actions and agency relations mediated by works of art understood as indexes that give rise to inferences of particular kinds Throughout the two volumes the focus is on the particular nexus in which a copy an edition an extract is embedded and on the way that nexus might be described by early modern people *Resources in Education*, 1997

Students and Society in Early Modern Spain Richard L. Kagan, 2019-12-01 Originally published in 1974 The close connection between universities and bureaucratic institutions such as church and state was perhaps first noticed by Max Weber Such institutions he observed require a dependable source of cadres to run them Thus the size and composition of university enrollments are often a function of bureaucratic needs Richard Kagan examines the dynamics of this relationship historically by racing the growth and decline of the university system in Castile the heart of the Spanish monarchy between 1500 and 1809 This period marked the emergence of a strong Habsburg state and a militant Catholic church both of which

looked to the universities for educated men Accordingly the universities grew rapidly and by 1600 Castile was perhaps the best educated kingdom in Europe But this did not last Jobs were increasingly filled through nepotism causing students to abandon the universities in search of other careers By 1700 the universities were small backward institutions Kagan begins by examining the nature and position of primary secondary and university institutions in Hapsburg Spain concentrating on the extent and purpose of literacy In Part II Kagan discusses the growth and development of the ruling hierarchies in the bureaucratic world and gives special consideration to the criteria used to recruit officials The author concludes with an assessment of the impact of bureaucratic changes in church and state on the universities of Castile The data he collects on changes in the curriculum the professorate and the social and geographical backgrounds of the students are used to support hypotheses about the spectacular rise and collapse of university education in Spain the process of modernization the development of bureaucracies and the crisis of the Spanish monarchy Students and Society in Early Modern Spain demonstrates that institutions of higher learning often collapse when they become over professionalized and fail to respond to changing conditions Thus Kagan provides a study of education and social change of why educational institutions are central to a society in one century but only peripheral to it in the next The author casts new light not only on the short lived educational revolution of the sixteenth century but also on education in other societies both past and present

Missions of Universities Lars Engwall, 2020-05-27 This book provides an analysis of university missions over time and space It starts out by presenting a governance framework focusing on the demands on universities set by regulators market actors and scrutinizers It examines organizational structures population development the fundamental tasks of universities and internal governance structures Next the book offers a discussion of the idea and role of universities in society exploring concepts such as autonomy and universality and the university as a transformative institute The next four chapters deal with the development of universities from medieval times through the Renaissance towards the research universities in the nineteenth century in Europe and the United States The following five chapters analyse recent developments of increasing external demands manifested through evaluations accreditations and rankings which in turn have had effects on the organization of universities Topics discussed include markets managers globalization consumer models and competition The book concludes by a discussion and analysis of the future challenges of universities
