Study Of Religions:

The Study of Religion George D. Chryssides, Ron Geaves, 2013-12-05 This updated textbook unravels the complex issues related to methodology and theory in the study of religion. It equips students with the knowledge needed for the academic study of religion, explaining the history of the methodology, including ideas of key theorists, and discusses key issues in the field such as gender, phenomenology, and the insider/outsider discourse. Updated throughout, additional material includes a new chapter on colonialism and post colonialism, a new chapter on insider/outsider discourse, coverage of cyber religion and the internet as a research tool in religious studies. Study and classroom features in each chapter include Chapter outlines, Case studies, Boxed key concepts, Discussion questions, Chapter bibliographies. The text is illustrated throughout with 35 images and extra resources can be found online, including additional coverage of levels of religion. *Introduction to the Study of Religion* Hillary P. Rodrigues, John S. Harding, 2008-08-20 Why do people study religion? How have they studied it in the past? How do we study religion today? Is the academic study of religion the same as religious education? These and many other questions are addressed in this engaging introduction to the discipline of religious studies, written by two experienced university teachers. The authors have crafted this book to familiarize novice students with key concepts and terminology in the study of religion. More advanced students will find a varied array of theoretical perspectives and methodological approaches to the field. Topics include definitions of religion, perspectives in the study and teaching of religion, how religion began to be studied, traditional perspectives, philosophical and theological, how people experience religion, perspectives in the study of religious consciousness and perception, phenomenological and psychological, studying religion within communities, social and cultural perspectives, anthropological, sociological, political and economic, judging religion, critical perspectives, feminist approaches, the interaction of popular literature and religion, contextual perspectives, historical and comparative. The book encourages students to think critically about the theories and methods presented. Students will find arguments for the strengths and limitations of these approaches, understand connections among religious studies and other intellectual movements, and develop their own ideas of how they might want to go about the study of religion. Summary boxes, a timeline, a glossary, and other pedagogic aids help students grasp key concepts along with a companion website at www.sastor.com.

A STUDY OF RELIGIONS Mr R M CHOPRA, 2022-07-04 The study of religions concerns enduring questions about religions, human society, and the meaning individuals and communities make in life. The study of different religions also facilitates interaction with people of other religions and their cultural, historical, intellectual, and social phenomena. This also provides a basic understanding of major religious traditions of the world, their ethico-social and mystical approach to religion, but more so, a deep understanding of their fundamental principles and philosophical concerns such as ethical foundation, metaphysics, and the nature and form of salvation. I also feel that studying such material is bound to give one a richer and more sophisticated understanding of human beliefs and practices regarding sacred, numinous, spiritual, and divine. Another reason

why one should undertake study of different religions is the analysis of influential cultural definition of individual and social identity as it will contribute significantly and distinctively to our knowledge of human nature global cultures diversity and ethical standards and practices This subject has assumed greater importance in the contemporary world as we are living in a pluralistic society which contains people belonging to diverse groups of religious cultures and traditions Pluralistic societies now exist around the world which contain many different religious groups There is constant mutual interaction between these groups in one and the same society For maintaining civic peace tranquility and harmony it has become imperative for those religious groups to tolerate each other and build relationships Pluralism is more than mere tolerance of differences it requires knowledge of them Tolerance is no doubt important but it does little to remove our ignorance of one another In order to overcome preconceived notions constituents of the society have to be educated to know the basics of those religions This involves understanding people with different religious beliefs and knowing the fundamentals of their religions In the contemporary world it is impossible for any one religion to exist in splendid isolation and ignore the others In spite of science technology and modernity dominated scenario religious freedom remains one of the most cherished and treasured liberties of mankind P 2 2 Considering the significance and importance of this subject even many of the universities around the world have started Centres for the study of Comparative Religions In these Centres specialized courses of study are provided to impart education and knowledge on different religions in order to combat the challenges posed by religious pluralism Keeping this in view I have briefly attempted to present in this monograph basic and fundamental aspects of all the major practising religions of the world so that we should be able to find common grounds of understanding for peaceful co existence for the betterment of the society in which we live The monograph for easy comprehension of readers has been set out in four sections as follows 1 Section I Study of Different Religions In this part are dealt Religion its meaning Importance of comparative study of religion Different aspects and dimensions of religion 2 Section II Major Religions of the World In this part are dealt major religions of the world and their fundamentals as I understand Judaism Christianity Islam Zoroastrianism Hinduism Jainism Buddhism Sikhism Taoism Confucianism Shintoism 3 Section III Unity and Universality of Religions In this part are dealt different prayers of religions and also subjects such as Unity in Diversity Unity of Religions and Metaphysics Similarities in Religions Essential Unity of all Religions 4 Section IV Essays on Religion In this part are dealt subjects such as Religion and Science Religion and Modernity Secularism Philosophy of Religion Do we Need Religion Inter religious Dialogue The approach taken in this book is one to understand the basic and fundamental principles shorn of their superfluous forms and formalities rites and rituals of all the major practicing religions of the world and to underscore points of commonalities in them regarding truth spirituality ethics and morals I am of the firm conviction that the same essence and energy run through all the religions
