## Studying Human Rights:

### Research Methods for International Human Rights Law

Damian Gonzalez-Salzberg,Loveday Hodson,2019-06-13  
The study and teaching of international human rights law is dominated by the doctrinal method. A wealth of alternative approaches exists but they tend to be discussed in isolation from one another. This collection focuses on cross theoretical discussion that brings together an array of different analytical methods and theoretical lenses that can be used for conducting research within the field. As such it provides a coherent, accessible and diverse account of key theories and methods. A distinctive feature of this collection is that it adopts a grounded approach to international human rights law through demonstrating the application of specific research methods to individual case studies. By applying the approach under discussion to a concrete case it is possible to better appreciate the multiple understandings of international human rights law that are missed when the field is only comprehended through the doctrinal method. Furthermore since every contribution follows the same uniform structure this allows for fruitful comparison between different approaches to the study of our discipline.

**International Human Rights** Michael Haas,2008 Publisher Description

*China and International Human Rights* Na Jiang,2013-12-12 This book is designed to introduce law students, legal actors and human rights activists, particularly participants in human rights dialogues with China, to the process and reality of a newly confident China's participation in the international human rights system, albeit with inherent challenges. From an international and comparative perspective, one of the key findings of the author's research is that progress towards human rights depends more on judges than on legislators. Chinese legislators have enacted a series of reforms in order to better protect human rights. Unfortunately, these reforms have not led to greater adherence to China's international human rights obligations in practice. The reforms failed because they have generally been misunderstood by Chinese judges who often have a limited understanding of international human rights norms. Specifically, this book will examine how judicial misunderstandings have blocked reforms in one specific area: the use of severe punishments based on international human rights theory and case studies and data analyses. This examination has several purposes. The first is to suggest that China ratify the ICCPR as the next step for its substantive progress in human rights and as a good preparation for its re-applying to be a member of the UN Human Rights Council in the future. The second is to explain how judges could be better educated in international human rights norms so as to greatly reduce the use of severe punishments and better comply with China's human rights obligations. The third is to demonstrate how the international community could better engage with China in a manner that is more conducive to human rights improvements. The author's ultimate goal is to enhance dialogue on human rights in China between judges and the Chinese government, between Chinese judges and their foreign counterparts, and between China's government and the international community. Another significant aim of this book is to clarify the controversial question of what obligations China should undertake before its ratification of the ICCPR and to re-examine trends in its developing human rights policy after

standing down from the Council in late 2012 The tortuous progress of China's criminal law and criminal justice reforms has confirmed that Chinese judges need further instruction on how to apply severe punishments in a manner consistent with international standards Judges should be encouraged to exercise more discretion when sentencing so that penalties reflect the intent of relevant domestic laws as well as the international human rights standards enumerated in the ICCPR In order to better educate and train judges this book contains introductory chapters that examine the severe punishments currently available to Chinese judges from an international human rights perspective To illustrate how Chinese justice currently falls short of international norms this paper also examines several cases that are considered to be indicative of China's progress towards greater respect for human rights and the rule of law These cases demonstrate that China still has a long way to go to achieve its goals at least before abolishing the death penalty forced labor and torture

International Sporting Events and Human Rights Zack Bowersox,2018-11-12 Questions have recently been raised about the political consequences a state experiences when hosting an international sporting event As the Olympics and FIFA World Cup have visited Brazil and Russia and the latter is slated to visit Qatar issues regarding human rights poverty and human trafficking have seemingly appeared as frequently in media coverage as the results of competition This text begins to build an understanding of just how a state's human rights are influenced by both the want and actual experience of hosting It finds that hosts behave differently when the eyes of the world are on them and that these events do produce positive effects on a state's level of respect for human rights Yet it also identifies those areas in which hosts organizations like the IOC and FIFA and the international sports regime can help to strengthen and expand human rights

**Conceptualising Comparative Politics** Anthony Petros Spanakos,Francisco Panizza,2015-07-16 Comparative politics often involves testing of hypotheses using new methodological approaches without giving sufficient attention to the concepts which are fundamental to hypotheses particularly the ability of these concepts to travel Proper operationalising requires deep reflection on the concept not simply establishing how it should be measured Conceptualising Comparative Politics the flagship book of Routledge's series of the same name breaks new ground by emphasising the role of thoroughly thinking through concepts and deep familiarity with the case that inform the conceptual reflection In this thought provoking book established academics as well as emerging scholars in the field collect and invite scholarship in the tradition of conceptual comparative politics The book posits that concepts may be used comparatively as lenses building blocks and scripts and contributors show how these conceptual tools can be employed in original comparative research Importantly contributors to Conceptualising Comparative Politics do not simply use concepts in one of these three ways but they apply them with careful consideration of empirical variation The chapters included in this volume address some of the most contentious issues in comparative politics populism state capacity governance institutions elections secularism among others from various geographic regions and model how scholars doing comparative politics might

approach such subjects Concepts make possible scholarly conversations including creative confrontations across paradigms Conceptualising Comparative Politics will challenge you to think of how to engage in conceptual comparative inquiry and how to use various methodologically sound techniques to understand and explain comparative politics Research on Knowledge and Practice of Human Rights in Secondary Schools ,2006 China Exchange News ,1994 A review of education science and academic relations with the PRC Human Rights and Social Work United Nations Centre for Human Rights,1994 **International Law Studies** Naval War College (U.S.),1998 Studies in Texts Joseph Parker,1898
