## **Migration and Health** Marc B.

Schenker,Xóchitl Castañeda,Alfonso Rodriguez-Lainz,2014-10-24 The study of migrant populations poses unique challenges owing to the mobility of these groups which may be further complicated by cultural educational and linguistic diversity as well as the legal status of their members These barriers limit the usefulness of both traditional survey sampling methods and routine public health surveillance systems Since nearly 1 in 7 people in the world is a migrant appropriate methodological approaches must be designed and implemented to capture health data from populations This effort is particularly important

because migrant populations in comparison to other populations typically suffer disparities related to limited access to health care greater exposure to infectious diseases more occupational injuries and fewer positive outcomes for mental health and other health conditions This path breaking handbook is the first to engage with the many unique issues that arise in the study of migrant communities It offers a comprehensive description of quantitative and qualitative methodologies useful in work with migrant populations By providing information and practical tools the editors fill existing gaps in research methods and enhance opportunities to address the health and social disparities migrant populations face in the United States and around the world Developing Historical Thinkers Bruce A. Lesh,2023 Learn how to engage students in investigating the past Lesh provides research based guidance to help teachers grades 6 12 develop and use questions that guide historical inquiries align assessment to inquiry and incorporate difficult histories Each chapter uses a specific lesson framed by student work to illuminate approaches in real classroom scenarios
