The Modern Middle School Addressing Standards And Student Needs:

The Modern Middle School Gilbert Hunt, Dennis Wiseman, Sandra Bowden, 2003 Middle school educators are facing many challenges in today's educational and political environment due to the focus on excellence as measured by achievement tests. It is the purpose of this book to provide a discussion of how middle schools can provide a strong standards based academic program while at the same time remaining focused on the student centered principles upon which the middle school experience should be based. The text is intended to aid readers in the development of the teaching philosophies, behaviors, and skills relevant to effective instruction in the unique middle school environment. This emphasis reflects the philosophy that teachers ultimately determine the quality of schooling and that the learning environment should be student centered while maintaining a strong academic foundation. The text begins with an overview of the origins and essential elements of middle schools, proceeds through discussions of middle school teachers, students, schooling structures, and teaching strategies, and concludes with a view of the future. Specifically, chapters offer suggestions for teaching and learning in the middle school environment, for developing essential teaching characteristics for creating a positive middle school climate, for planning the curriculum, for providing developmentally appropriate instruction, and for assessing and reporting student progress. This outstanding new edition provides a comprehensive, current, and cohesive text that allows the reader to more clearly understand the nature and importance of significant standards issues and developments within the ongoing evolution of the modern American middle school.

Best Practice in Motivation and Management in the Classroom

Dennis G. Wiseman, Gilbert Hunt, 2008 This text offers practical information and vicarious practice for both beginning as well as veteran teachers to become more knowledgeable, skilled, and effective in their work. Through study and application of what has been studied and the analysis and evaluation of the end result of this application, teachers who care to improve can improve. And teachers who are already successful in their teaching can be even more successful. Effective teachers are active learners themselves. This text therefore provides a specific context and focus for this active learning in the areas of student motivation and classroom management, which are considered critical for best practice in teaching in classrooms today. The book reviews appropriate strategies when responding to specific types of student misbehavior and also discusses zero tolerance policies, expulsion, teaching special students, addressing diversity, violence, school uniforms, and drug abuse as related to management and motivation. It is highlighted with supporting case study examples, question and activity sections by chapter, and a helpful glossary. Also provided is an overview of ten popular models for classroom management with the theorists associated with their development. By reading this book, teachers will get their students to achieve at high levels in demonstrating what they have learned through the application of the most important intertwined areas of motivation and classroom management.
