PHS-supported Research: pt. A. Subject access A-H, 1992 **The Molecular Basis of Dementia** John Herbert Growdon, 2000 This work aims to shed light on the potential causes and pathogenesis of Alzheimer s disease Lewy body diseases and frontotemporal dementias The focus on these clinical diseases is complemented by research reports on transgenic mouse models of alpha synuclein tau and amyloid accumulation in the brain The underlying premise of the research reported in this book is that improved understanding of these protein molecules will open novel avenues of treatment and perhaps even prevention of these neurodegenerative diseases Contributors include academic scientists scientists in industry and clinical investigators all committed to transferring the insights gained in basic research to the

physician caring for persons with dementia *The Neuropathology of Temporal Lobe Epilepsy* C. J. Bruton, 1988 The anterior temporal lobectomy is a neurosurgical operation designed to treat patients with severe temporal lobe seizures One of the largest series of such operations was undertaken at the Maudsley Hospital by a team led by Murray Falconer While the results of the Maudsley study have been published piecemeal over the years a complete assessment has not been possible until now and at times the value of the operation has been questioned This book provides the first in depth examination of the Maudsley Hospital program In addition to investigating the results of the operations it presents a new classification of the pathological abnormalities found in temporal lobe surgery and gives an unbiased assessment of the technique s successes and failures along with a guide to the future selection of patients **Handbook of Clinical Neurology** P. J. Vinken, G. W. Bruyn, 1968 *Oxford Textbook of Old Age Psychiatry* Tom Denning, Alan Thomas, 2013-09-26 The Oxford Textbook of Old Age Psychiatry Second Edition previously called Psychiatry in the Elderly is an updated and revised version of this popular and highly respected textbook The book has established itself as the standard textbook in its field due to its unique combination of comprehensive coverage clear writing and authoritative and up to date information This new edition maintains these strengths with chapters covering the basic sciences underpinning old age psychiatry clinical practice psychiatric services for older people specific disorders and medico legal and ethical issues This new updated edition involves 96 contributors from around the world bringing a truly global perspective to the textbook and highlighting both the common burdens and the differences in management from country to country New chapters have been included to reflect the development of old age care covering palliative care ethics of caring and living and dying with dementia Chapters have been revised and updated throughout with expanded chapters including those on brain stimulation therapies memory clinics and services and capacity which has been extended to include all mental capacity and decision making Broad in its coverage written by experts in their fields and maintaining a clear structure throughout the new second edition of the Oxford Textbook of Old Age Psychiatry is the essential reference for all old age psychiatrists as well as all those interested in the mental health care of older people Biomedical Index to PHS-supported Research , 1993 *Neuroanatomy and Neuropathology* Ralph M. Reitan, Deborah Wolfson, 1985 This volume will concentrate on the structure and pathology of the brain rather than the spinal cord the peripheral nervous system or the relationships of nervous system functioning to other organs or systems of the body The significance of other organs and systems for normal brain function is recognized and we refer to their importance throughout the text particularly in the section on toxic and metabolic problems Equally significant for behavior are the input mechanisms the brain cannot be influenced unless it is reached by afferent impulses and output mechanisms the brain cannot respond unless it can control efferent impulses to effector organs Despite their obvious importance we do not attempt to provide a formal review of sensory or motor systems with relation to the brain **Handbook of Neurochemistry** Abel Lajtha, 1982 *Essentials of Neurology* John Nicholas Walton, 1989 The 6th edition of this book has been deliberately aimed at
