## **The Monochrome Society New Forums:**

*The Monochrome Society* Amitai Etzioni, 2003-01-26 Amitai Etzioni is one of the most influential social and political thinkers of our day a man synonymous with the ideas of communitarianism In this book Etzioni challenges those who argue that diversity or multiculturalism is about to become the governing American creed On the surface America may seem like a fractured mosaic but the country is in reality far more socially monochromatic and united than most observers have claimed In the first chapter Etzioni presents a great deal of evidence that Americans whites and African Americans Hispanics and Asian Americans new immigrants and decedents of the Pilgrims continue to share the same core of basic American values and aspirations He goes on to show that we need not merely a civil but also a good society one that nurtures virtues He assesses key social institutions that can serve such a society ranging from revived holidays to greater reliance on public shaming The most effective sources of bonding and of shared ideas about virtue he insists throughout come from the community not from the state Etzioni also challenges moral relativists who argue that we have no right to impose our moral values on other societies He responds to those who fear that a cohesive community must also be one that is oppressive authoritarian and exclusive And he explores and assesses possible new sources and definitions of community including computer mediated communities and stakeholding in corporations By turns provocative and reassuring the chapters here cut to the heart of several of our most pressing social and political issues The book is further evidence of Etzioni's enduring place in contemporary thought

**From Empire to Community** Amitai Etzioni, 2015-01-06 Whether one favors the U S global projection of force or is horrified by it the question stands where do we go from here What ought to be the new global architecture Amitai Etzioni follows a third way drawing on both neoconservative and liberal ideas in this bold new look at international relations He argues that a clash of civilizations can be avoided and that the new world order need not look like America Eastern values including spirituality and moderate Islam have a legitimate place in the evolving global public philosophy Nation states Etzioni argues can no longer attend to rising transnational problems from SARS to trade in sex slaves to cybercrime Global civil society does help but without some kind of global authority transnational problems will overwhelm us The building blocks of this new order can be found in the war against terrorism multilateral attempts at deproliferation humanitarian interventions and new supranational institutions e g the governance of the Internet Basic safety human rights and global social issues such as environmental protection are best solved cooperatively and Etzioni explores ways of creating global authorities robust enough to handle these issues as he outlines the journey from empire to community

**Community** Gerard Delanty, 2013-09-13 The increasing individualism of modern Western society has been accompanied by an enduring nostalgia for the idea of community as a source of security and belonging and in recent years as an alternative to the state as a basis for politics Gerard Delanty begins this stimulating introduction to the concept with an analysis of the origins of the idea of community in Western Utopian thought and as an imagined primitive state equated with

traditional societies in classical sociology and anthropology He goes on to chart the resurgence of the idea within communitarian thought the complications and critiques of multiculturalism and its new manifestations within a society where new modes of communication produce both fragmentation and the possibilities of new social bonds Contemporary community he argues is essentially a communication community based on new kinds of belonging No longer bounded by place we are able to belong to multiple communities based on religion nationalism ethnicity life styles and gender

### **Community**

**Resources** Johanna Gibson,2016-12-05 Protection of traditional knowledge and resources is of critical concern not only to the groups involved but also to the international trading community for which these resources are of increasing economic importance This work examines the concept of community intellectual property models and additional sources for protection at international law including environmental and human rights frameworks Intellectual property law is critiqued as an inadequate framework to address the fundamental object of protection for the communities themselves the management of traditional use as well as the biological and cultural sustainability of this use The work sets out an international framework based on the concept of community resources recognizing the unique claims embodied in traditional knowledge incorporating customary law and facilitating community management of resources International in perspective and scope the book will be a valuable resource for academics and researchers in law international relations and cultural studies
