Secret Britain: Unearthing our Mysterious Past | Aberlemno Pictish Stones | Angus Ancient symbols that have never been deciphered The red sandstone monolith leans gently, its ancient face covered in strange, deeply carved symbols. At the top there's a dark snaking form. Then, a zigzag with linked discs positioned in the angles. At the base, there's a circular form that can best be described as resembling a looking-glass mirror. This is the Aberlemno 'Serpent Stone', and the carvings date to the 500s or early 600s AD. Just a few metres further along the grassy verge is another carved stone, and then another. A final enigma stands in the churchyard nearby. The village of Aberlemno is, for unknown reasons, blessed with one of the best collections of ancient Pictish art in existence. The Picts are the almost-legendary race of people who lived in what's now north and eastern Scotland until the 900s AD. The Romans coined the name, from the Latin *picti*, meaning 'painted people'. It wasn't intended to be complimentary, but rather to describe their savage, barbarian ways. These Picts, the Roman writers said, fought naked but for their paint, and were happy to wade neck-deep through swamps in order to wage guerrilla warfare. They were battle-hardened, proud people, who thrived in the harsh northern lands beyond the Roman frontier. Left The Serpent Stone, with snake, Double-Disc and Z-Rod, and mirror and (less discernable) comb at the bottom. It might spell out a Pictish leader's name from 1,500 years ago, if only we knew how to read it. The back of this stone also has prehistoric ritual cup marks – perhaps a reason the Picts decided to use this stone for carving in the first place. Uffington White Horse | Oxfordshire Bronze Age Sun and Horse Worship This is the oldest hill figure in the country, and it's a beauty. Close up, it's hard to see how the lines fit together, but stand a few hundred metres away and you'll see an elongated equine body, lean and light, flowing across the undulations of the hillside. The horse gallops above an unusual natural feature called the Manger, a dry valley with springs at its base, and a low round knoll, Dragon Hill, to one side. Another 200 m (655 ft) further up the hill is a large hillfort enclosure known as Uffington Castle. Archaeologists have dated the horse by taking samples from the soil directly below the lowest level of chalk and testing them with a technique called 'optically stimulated luminescence dating'. It determines when quartz particles in the soil were last exposed to sunlight. The sun last shone down on the soil under the horse at the end of the Bronze Age, or start of the Iron Age, between 1200–800 BC. It means the horse is about 3,000 years old. The fact that it has survived means that an unbroken chain of 150 generations of people have climbed the hill to preserve it, pulling out the encroaching grass and repacking the outline with fresh chalk, pounded into place. If just one generation of people had decided not to bother, the horse would have disappeared into the hillside, and been lost forever. Left An unbroken chain of people have maintained this ancient hill figure, or 'geoglyph' for 3,000 years. It's a horse, but it does have a funny shaped head. And a break. Tintagel | Cornwall King Arthur's Island of Stories Tintagel is almost an island – surrounded by sea but linked to the main Cornish coast by an increasingly slim strip of rock and sand. It's like the set of a Hollywood showstopper, steeped in myth, a perfect backdrop for tales of knights and damsels from a lost age. The archaeological reality is a little more nuanced, but just as stunning. The name 'Tintagel' originates from early Cornish, with *din* meaning 'fort'

*History and the Construction of the Child in Early British Children's*

*Literature* Jackie C. Horne, 2016-04-22 How did the flat characters of eighteenth century children's literature become round by the mid nineteenth? While previous critics have pointed to literary Romanticism for an explanation, Jackie C. Horne argues that this shift can be better understood by looking to the discipline of history. Eighteenth century humanism believed the purpose of history was to teach private and public virtue by creating idealized readers to emulate Eighteenth century children's literature with its impossibly perfect protagonists and its equally imperfect villains. Echoes history's exemplar goals. Exemplar history however came under increasing pressure during the period and the resulting changes in historiographical practice an increased need for reader engagement and the widening of history's purview to include the morals, manners and material lives of everyday people find their mirror in changes in fiction for children. Horne situates hitherto neglected Robinsonades historical novels and fictionalized histories within the cultural, social and political contexts of the period to trace the ways in which idealized characters gradually gave way to protagonists who fostered readers sympathetic engagement. Horne's study will be of interest to specialists in children's literature, the history of education and book history.
