## WHO GOES THERE?

by JOHN W. CAMPBELL, JR.

TO THE READERS OF SCIENCE-FICTION, that fascinating type of literature dealing with that which can happen, but has not happened yet, the name of JOHN W. CAMPBELL is as important as is Newton's name in physics, or Shelley's name in poetry. For Mr. CAMPBELL is that rare combination, editor and author. As editor he has guided ASTOUNDING SCIENCE-FICTION to its present pre-eminence, and by his standards he has set the entire pattern of modern science-fiction; as an author, writing under his own name and as "Don A. Stuart", his famous pen name, he has put to paper some of the finest and most thrilling adventure yarns of other times and places ever written. The seven novelettes comprising this volume represent Don A. Stuart at his best.

These are stories that will be avidly read—again and again. The pages of this book will transport the reader into fabulous realms of the imagination that he will long remember. For here are such unforgettable tales as *Elimination*, wherein a machine that foretells the future is invented—to the inevitable tragedy that befalls its inventors; *Blindness*, a tale of a modern Prometheus, attempting to snatch away atomic energy from the Sun itself, returning to Earth to find that his efforts were in vain; *Twilight* and the sequel *Night*—those heroic sagas of men, who thrown forward distant eons of time, find a world that has expended its energy, its activity—its very life. And here, also, is a title story that tells of an alien monstrosity from another planet, with the terrifying ability to assume any living form, and an Antarctic expedition faced with the terrible dilemma of determining who is yet man—or monster!

WHO GOES THERE? is a book for the reader who wishes to escape a too-concrete world and a too-limited, matter-bound sphere wherein man must remain shackled in discontent; for such a reader these fascinating stories will be a release to an adventure in imagination.

*Who Goes There?* John Wood Campbell (Jr.), 2009 *Who Goes There* The novella that formed the basis of *The Thing* is the John W Campbell classic about an antarctic research camp that discovers and thaws the ancient frozen body of a crash landed alien The creature revives with terrifying results shape shifting to assume the exact form of animal and man alike Paranoia ensues as a band of frightened men work to discern friend from foe and destroy the menace before it challenges all of humanity The story hailed as one of the finest science fiction novellas ever written by the SF Writers of America is best known to fans as *THE THING* as it was the basis of Howard Hawks *The Thing From Another World* in 1951 and John Carpenter's *The Thing* in 1982 With a new Introduction by William F Nolan author of *Logan's Run* and his never before published suspenseful Screen Treatment written for Universal Studios in 1978 this is a must have edition for sci fi and horror fans

**Who Goes There?** John Wood Campbell (Jr.), 1976 Elimination is the story of the effect of a gadget on the human character of the inventor The other stories are based on the premise What if a man invented a time viewer which *Who Goes There* is the story of an alien a non mechanical gadget who provokes a special mood reaction in the reader [Heritage Rare Books & Manuscripts Auction Final Session # 683](#) , **HSA Books and Manuscripts Dallas Auction Catalog #682**

Sandra Palomino, 2008 **Who Goes There** John W. Campbell, 2011-12-01 A group of scientists An object buried under the ice A terrifying fight for survival When a group of scientific researchers isolated in Antarctica stumble across an alien spaceship buried in the ice it seems like an incredible opportunity The alien pilot can just be seen a shadowy figure frozen just a short depth into the ice It looks as though he survived the crash only to be flash frozen on the Antarctic plateau The team fight the frozen conditions to free the ship from the ice with disastrous consequences and rescue the alien As they transport the corpse one of their greatest finds out on the ice back to their camp several scientists begin to experience extraordinary vivid and unsettling dreams They're dismissed as the product of stress and the harsh conditions but the nightmare is only beginning *Who Goes There?* John W Campbell, Jr, 2025-01-17 *Who Goes There* by John W Campbell is a gripping science fiction novella set in the icy isolation of Antarctica A group of scientists discovers a mysterious alien creature buried in the ice only to find that it can imitate any living being perfectly Paranoia and fear grip the team as they realize the alien could be any one of them With trust crumbling and the stakes rising the survivors must find a way to stop the shape shifting entity before it escapes and threatens humanity itself This classic tale of suspense and psychological horror inspired the famous film *The Thing* and remains a cornerstone of the sci fi horror genre [HSA Heritage Auctions Rare Books Auction Catalog #6030](#) James Gannon, 2009-09 [Heritage Comics Auctions, Dallas Signature Auction Catalog #817](#) Ivy Press, 2005-06 *The Mechanics of Wonder* Gary Westfahl, 1998-01-01 This is a sustained argument about the idea of science fiction by a renowned critic Overturning many received opinions it is both controversial and stimulating Much of the controversy arises from Westfahl's resurrection of Hugo Gernsback for decades a largely derided figure as the true

creator of science fiction Following an initial demolition of earlier critics Westfahl argues for Gernsback's importance His argument is fully documented showing a much greater familiarity with early American science fiction particularly magazine fiction than previous academic critics or historians After his initial chapters on Gernsback he examines the way in which the Gernsback tradition was adopted and modified by later magazine editors and early critics This involves a re-evaluation of the importance of John W Campbell to the history of science fiction as well as a very interesting critique of Robert Heinlein's *Beyond the Horizon* one of the seminal texts of American science fiction In conclusion Westfahl uses the theories of Gernsback and Campbell to develop a descriptive definition of science fiction and he explores the ramifications of that definition The *Mechanics of Wonder* will arouse debate and force the questioning of presuppositions No other book so closely examines the origins and development of the idea of science fiction and it will stand among a small number of crucial texts with which every science fiction scholar or prospective science fiction scholar will have to read
