Scientific Inquiry Cycle: Review

Science helps researchers solve problems by applying knowledge and creating testing often based on a test. Many tests are used to solve problems using science. In cases or complex situations can have a complex impact. Understanding the problem fully, including its causes and effects, is the first step in finding an effective solution.

Designing solutions requires considering various constraints, such as budget, time, and safety concerns. Documenting the part of a solution might be a challenge. Documenting, as it is important to weigh trade-offs carefully. For example, choosing materials for a house that may affect its cost and ease of use, can influence the effectiveness of the solution.

After developing a solution, documenting how it works, what constraints affected it, and any compromises that have to be made and possibly involve on the way. Communication, sharing knowledge clearly, and reflecting on the impacts of the innovation and science steps. This process involves how sharing science locally encourages responsible decision-making and leads communities thrive.

6. Mark the best answer for each question.
