**Cases on Error Analysis in Foreign Language Technical Writing** Lebedeva, Nadezhda Anatolievna, 2023-07-21

There is a clear tendency to consider the errors committed by learners in the process of learning a foreign language not as a negative aspect but as a natural process in the development of their language skills. In the past, teachers and researchers pondered these errors as something unfavorable, something to prevent from occurring at all costs. In order to regulate this appearance of errors, many researchers in the field of foreign language technical teaching have started to study and track the errors made by these students. Knowing the most common types of errors is an important and necessary step to inform teachers about where to direct their efforts regarding the most problematic areas students face while producing their technical writing assignments in a foreign language. Cases on Error Analysis in Foreign Language Technical Writing provides relevant theoretical foundations and the latest empirical research findings in the area of error analysis in foreign language technical writing. This book also summarizes the experience of teaching a foreign language for professional purposes in various fields of higher education. Covering topics such as error analysis, lexical skills, and writing outputs, this casebook is an essential resource for preservice teachers, educators, administrators, librarians, researchers, and academicians.

**The Impossible State** Wael B. Hallaq, 2014-09-02 Wael B. Hallaq boldly argues that the Islamic state, judged by any standard definition of what the modern state represents, is both impossible and inherently self-contradictory. Comparing the legal, political, moral, and constitutional histories of premodern Islam and Euro America, he finds the adoption and practice of the modern state to be highly problematic for modern Muslims. He also critiques more expansively modernity's moral predicament, which renders impossible any project resting solely on ethical foundations. The modern state not only suffers from serious legal, political, and constitutional issues; Hallaq argues, but also by its very nature fashions a subject inconsistent with what it means to be or to live as a Muslim. By Islamic standards, the state's technologies of the self are severely lacking in moral substance, and today's Islamic state, as Hallaq shows, has done little to advance an acceptable form of genuine Shari'a governance. The Islamists' constitutional battles in Egypt and Pakistan, the Islamic legal and political failures of the Iranian Revolution, and similar disappointments underscore this fact. Nevertheless, the state remains the favored template of the

Islamists and the ulama Muslim clergymen Providing Muslims with a path toward realizing the good life Hallaq turns to the rich moral resources of Islamic history Along the way he proves political and other crises of Islam are not unique to the Islamic world nor to the Muslim religion These crises are integral to the modern condition of both East and West and by acknowledging these parallels Muslims can engage more productively with their Western counterparts     **The Law Journal**
