Competing for Excellence in Architecture Jean-Pierre Chupin,2017-10-01 A travel guide for those in search of architectural quality this book can be browsed in many ways Written in a clear and concise manner by about thirty authors it features a collection of editorials from the Canadian Competitions Catalogue CCC a large online digital archive open to the public since 2006 The editorials explore more than sixty Canadian architecture competitions held in the last seventy years Especially in recent years both public and private institutions have organized competitions across Canada producing hundreds of architectural urban planning and landscape design projects Together these proposals most of which remain unbuilt constitute a fantastic treasure in our tangible and intangible common heritage Given that competition organizers designers juries and critics never operate alone there is no doubt whatsoever that this book results from the collaboration of a myriad of people contributing to and competing for excellence in architecture Includes 497 illustrations and analytical tables **Analogical Thinking in Architecture** Jean-Pierre Chupin,2023-07-27 This book provides an in depth exploration of the rich and persistent use of analogical thinking in the built environment Since the turn of the 21st century design thinking has permeated many fields outside of the design disciplines It is expected to succeed whenever disciplinary boundaries need to be transcended in order to think outside the box This book argues that these qualities have long been supported by analogical thinking an agile way of reasoning in which think the unknown through the familiar The book is organized into four case studies the first reviews analogical models that have been at the heart of design thinking

representations from the 1960s to the present day the second investigates the staying power of biological analogies the third explores the paradoxical imaginary of analogous cities as a means of integrating contemporary architecture with heritage contexts while the fourth unpacks the critical and theoretical potential of linguistic metaphors and visual comparisons in architectural discourse Comparing views on the role of analogies and metaphors by prominent voices in architecture and related disciplines from the 17th century to the present the book shows how the analogical world of the project is revealed as a wide open field of creative and cognitive interactions These visual and textual operations are explained through 36 analogical plates which can be read as an inter text demonstrating how analogy has the power to reconcile design and theories **Inventaire des bâtiments construits entre 1919 et 1959 dans le vieux Montréal et les quartiers Saint-Georges et Saint-André** Robert A.
