The Pearly Gates Of Cyberspace:

The Pearly Gates of Cyberspace Margaret Wertheim, 1999 Arguing that one way of understanding cyberspace is as an attempt to realize an electronic version of heaven this book begins with the medieval definition of the world as spiritual space The author traces the emergence of modern physics with its emphasis on physical space and then presents her thesis that cyberspace an outgrowth of modern science nevertheless represents a return to medieval spiritual concerns Digital Performance Steve Dixon, 2007-02-23 The historical roots key practitioners and artistic theoretical and technological trends in the incorporation of new media into the performing arts The past decade has seen an extraordinarily intense period of experimentation with computer technology within the performing arts Digital media has been increasingly incorporated into live theater and dance and new forms of interactive performance have emerged in participatory installations on CD ROM and on the Web In *Digital Performance* Steve Dixon traces the evolution of these practices presents detailed accounts of key practitioners and performances and analyzes the theoretical artistic and technological contexts of this form of new media art Dixon finds precursors to today's digital performances in past forms of theatrical technology that range from the *deus ex machina* of classical Greek drama to Wagner's *Gesamtkunstwerk* concept of the total artwork and draws parallels between contemporary work and the theories and practices of Constructivism Dada Surrealism Expressionism Futurism and multimedia pioneers of the twentieth century For a theoretical perspective on digital performance Dixon draws on the work of Philip Auslander Walter Benjamin Roland Barthes Jean Baudrillard and others To document and analyze contemporary digital performance practice Dixon considers changes in the representation of the body space and time He considers virtual bodies avatars and digital doubles as well as performances by artists including Stelarc Robert Lepage Merce Cunningham Laurie Anderson Blast Theory and Eduardo Kac He investigates new media's novel approaches to creating theatrical spectacle including virtual reality and robot performance work telematic performances in which remote locations are linked in real time Webcams and online drama communities and considers the extratemporal illusion created by some technological theater works Finally he defines categories of interactivity from navigational to participatory and collaborative Dixon challenges dominant theoretical approaches to digital performance including what he calls postmodernism's denial of the new and offers a series of boldly original arguments in their place *Things*: Dick Houtman, Birgit Meyer, 2012-09-12 The relation between religion and things has long been conceived in antagonistic terms privileging spirit above matter belief above ritual and objects meaning above form and inward contemplation above outward action This book addresses these issues **Exploring Religious Community Online** Heidi Campbell, 2005 *Exploring Religious Community Online* is the first comprehensive study of the development and implications of online communities for religious groups This book investigates religious community online by examining how Christian communities have adopted internet technologies and looks at how these online practices pose new challenges to offline religious community and culture **Religion Today: A Reader** Susan
