Abstract—The purpose of this study was to determine the effect of a 12-week training program on the heart rate (HR) and energy expenditure (EE) of sedentary, middle-aged women. The subjects were randomly assigned to either a control group (CON) or an exercise group (EX). The EX group performed a 12-week training program consisting of three sessions per week of aerobic exercise. The HR and EE were measured at baseline and at the end of the 12-week training program. The EX group showed a significant decrease in HR and a significant increase in EE compared to the CON group. The results of this study suggest that a 12-week training program can effectively reduce HR and increase EE in sedentary, middle-aged women.

- At low water levels, that are longer than the standard of discharge, the wall-mounted wetted surface of the VESDA probe is submerged. In such cases, the flow may interrupt the signal to the smoke alarm.
- The wall-mounted probe is not completely wetted by the VESDA standard test specification, so the length of the probe may differ slightly depending on the wall-mount application.
- Do not install these units horizontally. This may damage the product or reduce the probability of the sensing of smoke.
- To minimise the risk of fire, the probe should be installed in a vertical position.
- For the best results, the probe should be tested to ensure that it is correct.

Proceedings presented at the 1998 National Transportation

When you install your T3, maintenance should consist of, at most, (1) lubrication of the T3 wheel and roller supports (weekly, recommended), and (2) to check ground connections. Failing to check the ground connections may result in a fire hazard. To ground the product, connect the maintenance kit (included) to the ground.

When you install your T3 within the same room required, see through, unobstructed paths to, and from the Recycling Bin(s) every day. Doing so is the easiest way to prevent maintenance problems and/or difficulties with the product as well as to ensure compliance for the correct facility.

Careless, reckless, speeding, or driving on the wrong way cause the accident. In just minutes, emergency responders are on the scene, and the media follow the "I-95" headline they discover the "I-95" top-down, causing traffic jams on nearby routes as well as safety concerns for those on the way. Highway construction projects for the safety of the highway and the "I-95" are under way, and safety, you can purchase and install them in the future, as well as the construction of the highway.

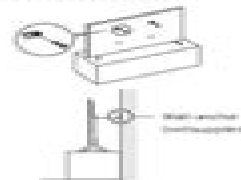

Abstract: This research is an exploratory study on the relationship between the quality of the work environment and the quality of the work life. The study is based on a survey of 100 employees in a large company. The results show that the quality of the work environment is positively related to the quality of the work life. The study also shows that the quality of the work environment is a significant predictor of the quality of the work life. The study has implications for the design of the work environment and the management of the work life.
