Homework Improvement Roberta Schneiderman,2005-09-02 Educational resource for teachers parents and kids A Teacher'S Tale Joe Gilliland,2015-03-05 It was never in author Joe Gillilands plan to become a teacher certainly not a college teacher and most certainly not an English teacher But thats what happened and hes never looked back In A Teachers Tale he explains how by neither planning for nor seeking a life of learning and teaching lacking a syllabus or lesson plan he discovered that a life in academe lay in his patha path hes followed for more than fifty years A Teachers Tale begins in 1932 with Gillilands first experiences in schooling and concludes in the summer of 1955 just as he completes his apprenticeship and stands on the brink of becoming a qualified instructor in a small college in east Texas This memoir presents a collection of stories about his experiences as a teacher and a college student A story of schooling deeply immersed in the arts and humanities A Teachers Tale shares Gillilands love of the university and how it compelled him to seek a life devoted to teaching primarily in the community college arena Through this narrative he brings together a philosophy of higher education based on the importance of arts and humanities in todays high tech world **Performance as Research** Annette Arlander,Bruce Barton,Melanie Dreyer-Lude,Ben Spatz,2017-12-06 Performance as Research PAR is characterised by an extraordinary elasticity and interdisciplinary drive Performance as Research Knowledge Methods Impact celebrates this energy bringing together chapters from a wide range of disciplines and eight different countries This volume focuses explicitly on three critical often contentious themes that run through much discussion of PaR as a discipline Knowledge the areas and manners in which performance can generate knowledge Methods methods and methodologies for approaching performance as research Impact a broad understanding of the impact of this form of research These themes are framed by four essays from the book s editors contextualising their interrelated conversations teasing out common threads and exploring the new questions that the contributions pose to the field of performance As both an intervention into and extension of current debates this is a vital collection for any reader concerned with the value and legitimacy of performance as research Selected Letters of Sir J. G. Frazer Robert Ackerman,2005-09-29 This is a fully annotated edition of selected letters by and in some cases to Sir J G Frazer 1854 1941 the eminent anthropologist classicist and historian of religion Frazer was read by virtually everyone working in those fields in the first third of the twentieth century His great work The Golden Bough offered a grand vision of humanity s mental and spiritual evolution from vain attempts to compel the gods to do our bidding which Frazer called magic through equally vain attempts to propitiate the gods through prayer and sacrifice his characterization of religion to rationality and science His richly varied correspondence with prominent figures such as Edmund Gosse A E Housman and Bronislaw Malinowski among others offers an unparalleled insight into British intellectual life of the time and also throws light upon the composition of The Golden Bough itself **The Pros and Cons of Using Chatbots** Adrian Wallwork,2025-11-09 Problem The world has got itself in a muddle with AI and particularly with chatbots

There is a lot of misunderstanding and far too much focus on the supposed negative aspects formulaic style of chatbot writing bias inherent in many chatbot answers and generated texts lack of inclusivity educators mistaken thinking that they can intuitively tell the difference between a human generated text and a bot generated text and that by default a human text is always better mistaken attitudes even among students themselves that using chatbots is a form of cheating rather than a highly effective study and teaching aid too much faith given to AI detectors and too little understanding of how students are really using chatbots i e mostly to advise suggest and correct rather than generate Solution and aims The aim of the book to give clear strategies for dealing with the negatives typically associated with chatbots and at the same time highlight the invaluable help that chatbots can give all types of users Very often in the world of education both in English and non English speaking countries these features and strategies get overlooked The book will teach readers strategies for distinguishing between human and AI generated texts in order to understand that both have their pros and cons coaxing bots to produce more human like texts and at the same time detailing methods for acknowledging usage of bots in essays assignments papers etc identifying bias in their own and AI generated texts and remedying this bias avoiding plagiarism avoiding being unjustly accused of AI usage students avoiding unjustly accusing students of using AI inappropriately teachers professors journal editors The audience is thus not just non native speakers who were the main audience for the English for Academic Research series Instead this book is aimed at everyone in education yet using the same user friendly structure that has become a hallmark of the Academic Research series Outcomes Teachers and professors will be better equipped to educate their students on how to use and not use chatbots They will also learn that trusting their intuition with regard to whether a text was generated with a bot or whether their students have committed plagiarism is absolutely not failsafe and should be avoided Students will be able to deal with the recognized challenges of using chatbots ethics bias plagiarism hallucinations and AI detection
