Personalized Board Books For Children:

Digital Personalization in Early Childhood Natalia Kucirkova, 2017-09-07 Digital personalization is an emerging interdisciplinary research field with application to a variety of areas including design education and publication industry. This book focuses on children's education and literacy resources which have undergone important changes with the personalization revolution in the early 21st century. The author develops original insights from educational research and her own studies concerned with digital and non-digital personalization to discuss in a clear and critical way the thinking, research issues and practical implications of this new field. She scrutinises the character of technology-based personalized education to substantiate the claim that the current models of personalized education tend to be technology and business driven with little pedagogical understanding of the social value of personalization. Research involving touchscreens, personalized books and 2-8 year olds is interrogated for its impact on children's development of language, creativity, identity as well as family dynamics and classroom dialogue. The literature available on digital and non-digital personalization is discussed in relation to five key themes of personalized education, the so-called 5As: autonomy, authorship, aesthetics, attachment and authenticity. It is argued that the 5As need to be anchored in humanist principles for a sustainable pedagogy and practice. Based on the insights from research with typically and atypically developing children, Kucirkova proposes personalized pluralisation as a pedagogical framework of personalized education for the future. The book aims to help scholars and professionals understand the connections between personalization and literacy, personalization and education, and personalization and wider socio-moral issues.

Literacy Development in Early Childhood Beverly Otto, 2019-02-14 Widely recognized as a leading text in its field, this popular guide explores literacy development beginning in infancy and through fourth grade. The latest edition continues to prepare teachers to create and implement literacy-rich curricula in early childhood classrooms while providing updates to federal legislation and highlighting the impact of state standards on educational settings. Recent technology is integrated into activities used to enhance literacy competencies. Throughout the book, the author's approach to reflective teaching empowers teachers to become effective decision makers and thoughtful mediators in children's transactions with literacy. A conceptual and theoretical foundation for describing reading and writing processes is followed by research-based descriptions of the signs of emergent literacy and developmentally appropriate instructional strategies. The emphasis on linguistic and cultural diversity includes an array of approaches for supporting English language learners. Chapter extension activities challenge readers to apply concepts through observation, research, curriculum development, and discussion. Sample observation and assessment forms assist in determining children's progress in developing literacy.

The Future of the Self Natalia Kucirkova, 2021-02-01 When children as young as three can take their own selfies and customise their own avatars, how should we respond to the opportunity and threat of digital personalization for young children? In this book, Kucirkova offers a comprehensive account of the effects of digitally mediated personalization on children's development of self.

Literature and Literacy for Young Children Cyndi Giorgis,2024-01-22 The 8th edition of this bestselling text provides a framework and instructional strategies for identifying selecting and teaching high quality children's literature for ages 0-8. This new edition's emphasis on diverse literature will assist in positively impacting the lives of all young people. Effective instructional approaches for using literature as a teaching tool are coupled with developmentally appropriate methods for sharing literature with young children. This book is a foundational text for graduate and undergraduate students in early childhood education, early literacy, literacy methods, children's literature, and literature instruction.
