explosive growth in the technology available to the collision analyst changing the way reconstruction is practiced in  
fundamental ways The greatest technological advances for the crash reconstruction community have come in the realms of  
photogrammetry and digital media analysis The widespread use of scanning technology has facilitated the implementation of  
powerful new tools to digitize forensic data create 3D models and visualize and analyze crash vehicles and environments The  
introduction of unmanned aerial systems and standardization of crash data recorders to the crash reconstruction community  
have enhanced the ability of a crash analyst to visualize and model the components of a crash reconstruction Because of the  
technological changes occurring in the industry many SAE papers have been written to address the validation and use of new  
tools for collision reconstruction Collision Reconstruction Methodologies Volumes 1 12 bring together seminal SAE technical
