**Process Approaches to Consciousness in Psychology, Neuroscience, and Philosophy of Mind** Michel Weber, Anderson Weekes, 2009-11-18 This collection opens a dialogue between process philosophy and contemporary consciousness studies Approaching consciousness from diverse disciplinary perspectives philosophy psychology neuroscience neuropathology psychotherapy biology animal ethology and physics the contributors offer empirical and philosophical support for a model of consciousness inspired by the process philosophy of Alfred North Whitehead 1861 1947 Whitehead s model is developed in ways he could not have anticipated to show how it can advance current debates beyond well known sticking points This has trenchant consequences for epistemology and suggests fresh and promising new perspectives on such topics as the mind body problem the neurobiology of consciousness animal consciousness the evolution of consciousness panpsychism the unity of consciousness epiphenomenalism free will and causation

**Consciousness in Humanoid Robots** Antonio Chella, Angelo Cangelosi, Giorgio Metta, Selmer Bringsjord, 2019-06-05 Building a conscious robot is a scientific and technological challenge Debates about the possibility of conscious robots and the related positive outcomes and hazards for human beings are today no longer confined to philosophical circles Robot consciousness is a research field aimed at a two part goal on the one hand scholars working in robot consciousness take inspiration from biological consciousness to build robots that present forms of experiential and functional consciousness On the other hand scholars employ robots as tools to better understand biological consciousness Thus part one of the goal concerns the replication of aspects of biological consciousness in robots by unifying a variety of approaches from AI and robotics cognitive robotics epigenetic and affective robotics situated and embodied robotics developmental robotics anticipatory systems and biomimetic robotics Part two of the goal is pursued by employing robots to advance and mark progress in the study of consciousness in humans and animals Notably neuroscientists involved in the study of consciousness do not exclude the possibility that robots may be conscious This eBook comprises a collection of thirteen manuscripts and an Editorial published by Frontiers in Robotics and Artificial Intelligence under the section Humanoid Robotics and Frontiers in Neurorobotics on the topic Consciousness in Humanoid Robots This compendium aims at collating the most recent theoretical studies models and case studies of machine consciousness that take the humanoid robot as a frame of reference The content in the articles may be applied to many different kinds of robots and to software agents as well

*Consciousness and Quantum Mechanics* Shan Gao, 2022

Consciousness and quantum mechanics are two mysteries in our times A careful and thorough examination of possible

connections between them may help unravel these two mysteries On the one hand an analysis of the conscious mind and psychophysical connection seems indispensable in understanding quantum mechanics and solving the notorious measurement problem On the other hand it seems that in the end quantum mechanics the most fundamental theory of the physical world will be relevant to understanding consciousness and even solving the mind body problem when assuming a naturalist view This book is the first volume which provides a comprehensive review and thorough analysis of intriguing conjectures about the connection between consciousness and quantum mechanics Written by leading experts in this research field this book will be of value to students and researchers working on the foundations of quantum mechanics and philosophy of mind

**Biologically Inspired Cognitive Architectures 2012** Antonio Chella, Roberto Pirrone, Rosario Sorbello, Kamilla Rún Jóhannsdóttir, 2012-09-29 The challenge of creating a real life computational equivalent of the human mind requires that we better understand at a computational level how natural intelligent systems develop their cognitive and learning functions In recent years biologically inspired cognitive architectures have emerged as a powerful new approach toward gaining this kind of understanding here biologically inspired is understood broadly as brain mind inspired Still despite impressive successes and growing interest in BICA wide gaps separate different approaches from each other and from solutions found in biology Modern scientific societies pursue related yet separate goals while the mission of the BICA Society consists in the integration of many efforts in addressing the above challenge Therefore the BICA Society shall bring together researchers from disjointed fields and communities who devote their efforts to solving the same challenge despite that they may speak different languages This will be achieved by promoting and facilitating the transdisciplinary study of cognitive architectures and in the long term perspective creating one unifying widespread framework for the human level cognitive architectures and their implementations This book is a proceedings of the Third Annual Meeting of the BICA Society which was held in Palermo Italy from October 31 to November 2 2012 The book describes recent advances and new challenges around the theme of understanding how to create general purpose humanlike artificial intelligence using inspirations from studies of the brain and the mind
