The Mendocino Coast:

Early Mendocino Coast Katy M. Tahja, 2008 Driving Highway 1 along the Mendocino coast is a scenic adventure that draws thousands of visitors every year Following the coast from Gualala on the south to Needle Rock in the north can be a challenge and features back road driving But imagine 100 years ago Were there roads then too How did people move along the coast And what were they doing Why did they settle here Forget the Gold Rush and the forty niners timber was king here Logging milling and shipping wood was the focus of the economy Railcars steamed through the forests and ships pulled up to rickety landings to load shipments for faraway places Today some coast views remain the same while others have changed dramatically and whole towns have vanished over the century *The Mendocino Coast -- a Vanishing Resource* ,1972*

Mendocino Coast Through Time Tammy Durston, 2019-11-25 The Mendocino Coast is known for its breathtaking beauty Jagged cliffs surround pristine beaches Giant redwoods follow the coastline It s no surprise that many movies have been filmed here Artists have been consistently drawn to the area as well as outdoor enthusiasts Fishing kayaking and cycling down Highway 1 are all very popular Native Americans first inhabited the area until it was discovered by those looking for timber In the 1800s milling operations dotted the coast Logging railroads were built and wharves constructed Dog hole schooners called that because the ports were so small that only a dog could turn around dipped into coves to pick up lumber Now those same coves are enjoyed by thousands of visitors each year Historic homes have been preserved into inns and museums Lighthouses offer a glimpse in the past as does the skunk train The entire town of Mendocino is a historic landmark Enjoy this look at the Mendocino Coast through time **The Historical Geography of the Mendocino Coast** Arthur E. Otterstrom, 2017-05-01 California s history is rich and diverse with numerous fascinating stories hidden in its past Before the discovery of gold in the Sierras San Francisco Yerba Buena and its surroundings comprised a sparsely populated frontier on the edge of the old Spanish realm After 1848 the area rapidly transformed into a settled urban system as a tremendous influx of prospectors and settlers came to seek their fortune in California A wave of gold miners merchants farmers politicians carpenters and many others from various backgrounds and corners of the world migrated to the area at that time Interrelated social geographic and economic processes led to a very quick metamorphosis from frontier settlement to a firmly established system with ingrained economic patterns The development of San Francisco s outlying region from a wilderness into a prosperous village and farming mecca shows how quickly in migration coupled with economic diversification can establish a stable settlement structure upon the landscape Otterstrom describes an intricately woven tapestry of interrelated

people who were contributing creators of a wide variety of prosperous northern California environs He uncovers the processes that converted this sleepy post Mexican outpost into a focal point of nearly hyperactive youthful growth The narrative follows this crucial story of settlement development until the dawn of the twentieth century through the interconnected framework of individual and family ingenuity migration trajectories and diverse geographical scales Multiplying individualistic experiences from across far flung appendages of the Northern California system into larger and larger scales Otterstrom has achieved a matchless historical and sociological study that will form the basis for any future studies of the area
