*The Original Language of the Lukian Infancy Narrative* Chang-Wook Jung, 2004-08-01 It has long been recognized that the Greek of the Lukian infancy narrative chapters 1-2 displays numerous Semitic features. Although the majority of recent scholarship assumes that such features stem from an imitation of the Septuagint imitation theory, the issue has not been settled satisfactorily. Others argue that Luke probably relied on a written source for the infancy narrative or at least for some parts of it and that this source material was composed in imitation of the Septuagint. Luke was not however merely the reviser or compiler of his source; rather he rewrote the source employing his own style and language for his own purpose. Here Chang Wook Jung examines the arguments most commonly put forward by both sides and considers their merits.

Taylor, 2012-12-06 The concept of symmetric space is of central importance in many branches of mathematics. Compactifications of these spaces have been studied from the points of view of representation theory, geometry and random walks. This work is devoted to the study of the interrelationships among these various compactifications and in particular focuses on the Martin compactifications. It is the first exposition to treat compactifications of symmetric spaces systematically and to unify the various points of view. The work is largely self-contained with comprehensive references to the literature. It is an excellent resource for both researchers and graduate students.
