Figures Glyn Edmund Daniel,1963 The Megalith Builders of Western Europe, by Glyn Daniel Glyn Daniel,1958 *The Megaliths of Northern Europe* Magdalena Midgley,2008-07 The North European megaliths are among the most enduring structures built in prehistory they are imbued with symbolic meanings which embody physical and conceptual ideas about the nature of the world inhabited by the first Northern farmers The Megaliths of Northern Europe provides a much needed up to date synthesis of the material available on these monuments incorporating the results of recent research in Holland Germany Denmark and Sweden This research has brought to light new data on the construction of the megaliths and their role in the cultural landscape and Magdalena Midgley offers a fascinating interpretation of the symbolism of megalithic tombs within the context of early farming communities This wealth of new evidence suggests the Northern European

megaliths were important foci in the wider north west European context The construction of dolmens and passage graves using huge glacial boulders demanded both great communal effort and considerable skill In addition to this technical expertise the master builders also made use of their esoteric knowledge of rituals This was expressed in the use of exotic building materials and special architectural features and in the placement of tombs within the natural and cultural landscapes creating new metaphors and images Fully illustrated this book will be of interest to both undergraduate and postgraduate students of European Prehistory Archaeology and Prehistoric Anthropology as well as architects who study ancient architecture and social anthropologists who study modern megaliths *Seed of Knowledge, Stone of Plenty* John A. von Fleischer, On the plains of Wiltshire in England lie the remains of ancient giant stones Exactly which people built these stones remains the eternal question Just like the pyramids of Egypt its origins remain shrouded in mystery Various theories have been put forward as to the race or otherwise of these builders but still much uncertainty remains The evidence is simply overwhelming that the earliest inhabitants of Britain and Ireland were Blacks Mythological archeological linguistic and other sources have substantiated this remarkable fact Candid authorities like the British Egyptologists Gerald Massey and Albert Churchward the Scottish historian David Mac Ritchie and the British antiquarian Godfrey Higgins have done exhaustive research and brought many facts to our knowledge Tacitus Pliny Claudian and other writers have described the Blacks they encountered in the British Isles as Black as Ethiopians Cum Nigris Gentibus nimble footed blackamoors and so on This book reveals much about the Black presence in the early British Isles including the mysterious builders of Stonehenge We learn about the Black Fomorians Partholonians Nemedians Firbolgs Tuatha De Danann Black Danes Black Douglasses the giants or Cyclopes and so on We also learn about the Black serpent worshiping Druids who built serpentine monuments like those at Avebury and Carnac as well as the builders of the Round Towers of Ireland The fact remains that Blacks have played a very important role in the early history traditions religion and so on of early Britain and elsewhere than is generally known and acknowledged This is a must read book **Ethnology** Augustus Henry Keane,1896 **Essays and Studies Presented to William Ridgeway on His Sixtieth Birthday, 6 August, 1913** Edmund Crosby Quiggin,1913 **God-apes and Fossil Men** Kenneth A.
