**The History of Chinese Ceramics** Lili Fang,2023-05-23 Adopting the perspective of anthropology of art and combining it with global academic insights this book helps the readers to recognize that history is in great measure the record of human activity which spreads from the local to the regional from the regional to the global and from the global to the universal Readers will learn that China was not only the first country to create porcelain but also the first to export it to the world both the products and its techniques Therefore the history of Chinese ceramics reflects the history of Chinese foreign trade on the one hand and depicts the expansion of Chinese ceramic techniques and cultures on the other In addition to ceramics types molds decoration and techniques the book analyzes the spiritual impacts and aesthetic conceptions embodied in the utensils of daily use by the Chinese literati Therefore it reaches the conclusion that ideological systems and not technological systems are what bring about social revolutions In addition the book is richly illustrated with pictures of earthenware and finely glazed pieces from later periods

been content to gather their information from Chinese sources and to arrange it in chronological order giving a more or less critical digest of the subject from the Chinese viewpoint but the question as to what the phenomena actually mean is as a rule shunned their interpretation hardly attempted It is certainly impossible to grasp any phenomenon within a given culture zone without understanding the parallel phenomena in other areas and without setting them in correlation with their concomitant factors The historical position and development of any cultural idea can be determined only by an attempt to unravel its causal connection with the natural group of related or associated ideas for no phenomenon is isolated or absolute but conditional upon others relative and cohesive Whether this method be styled that of comparative ethnology or archaology or that of culture science or something else does not matter It is there and must be applied if we are eager to reach results How it can be applied I wish to demonstrate by discussing on the following pages the nature of a simple instrument the potter's wheel Its concatenation with other technical elements and with social and religious factors will be pointed out and may help to show the history of pottery in a new light and in particular to determine the relation of ancient Chinese ceramic art to that of the West In a case like this one the
