The Best In Science Fiction:

The Best Science Fiction Bundle Michael Mathiesen, 2023-03-08 The Best Science Fiction Book Bundle is a combination of two of my latest works First The Book to End All Books and Second The Jupiter Sun During the writing of The Book to End all Books I found my heroine traveling to a moon of Jupiter and working on igniting the Gas Giant of Jupiter into our 2nd Sun in the sky As I was writing this story it seemed to me that this kind of thing could only be possible after we convinced the populations of the Earth that it was necessary to have a 2nd sun in the sky and present them all with far fewer totally dark nights Many of the days would be longer or at least Moonlit due to the 2nd sun in the sky SO this part of my story when we do finally get our 2nd sun takes place almost one thousand years from now After finishing that book I suddenly realized that we didn't have that kind of time left at the rate that we're continuing to use fossil fuels more and more and more people all around the world are demanding a higher standard of living which means even more CO2 in the air wherefore the tipping point the point in time where we would no longer be able to stop the rush to our own extinction would become closer and closer Some say it's too late already But always being an optimist rather than a pessimist and always seeing the glass as half full rather than half empty I decided to write a companion book that would explain in great detail and using the latest scientific evidence that if we did Ignite Jupiter into our 2nd sun it might be enough extra solar energy free clean and renewable energy that could rapidly replace fossil fuels and thus save our planet So the two books combined I believe make a really effective case for igniting the planet Jupiter which came close to being our 2nd sun but did not have a midwife nearby to attend the birth of same and so the poor planet lies off in the outer parts of our solar system on the other side of Mars and waits patiently for some intelligent life to come along and help her in her delivery If we can put a man on the moon as they say we can surely do just about anything we set our minds to Here's to humans saving their planet and SOON If you share my desire to be part of something really spectacular like creating a star in the sky and being able to say that you were alive at the moment when mankind reached their pinnacle of knowledge and wisdom and at the time when they could create humankind's greatest achievement then get this book bundle and jump on in **The Year's Best Science Fiction: Twenty-Second Annual Collection** Gardner Dozois, 2005-07-01 Widely regarded as the one essential book for every science fiction fan The Year's Best Science Fiction Winner of the 2004 Locus Award for Best Anthology continues to uphold its standard of excellence with more than two dozen stories representing the previous year's best SF writing The stories in this collection imaginatively take readers far across the universe into the very core of their beings to the realm of the Gods and to the moment just after now Included are the works of masters of the form and the bright new talents of tomorrow This book is a valuable resource in addition to serving as the single best place in the universe to find stories that stir the imagination and the heart **The Year's Best Science Fiction: Twenty-Seventh Annual Collection** Gardner Dozois, 2010-07-06 The thirty two stories in this collection imaginatively take us far across the universe into the very core of
