The Ipcc Guide To Irish Peatlands:

The IPCC Guide to Irish Peatlands Irish Peatland Conservation Council, 1987 **The Peatlands of Britain and Ireland** Clifton Bain, 2022-02-02 Clifton Bain now completes his trilogy with this look at the Peatlands of Britain and Ireland A source of fuel for many generations they are now a haven for wildlife and plants as well as a storehouse of greenhouse gasses Their social history is one of exploitation and the value of mending and restoring is a major theme of the book Like its predecessors The Peatlands of Britain and Ireland will be a sumptuous volume richly illustrated with photographs and with drawings by the wildlife artist Darren Rees **The Wetlands Handbook, 2 Volume Set** Edward Maltby, Tom Barker, 2009-07-23 Forty two chapters by international experts from a wide range of disciplines make The Wetlands Handbook the essential tool for those seeking comprehensive understanding of the subject A departure from more traditional treatises this text examines freshwater wetland ecosystem science from the fundamentals to issues of management and policy Introductory chapters address the scope and significance of wetlands globally for communities culture and biodiversity Subsequent sections deal with processes underpinning wetland functioning how wetlands work their uses and values for humans and nature their sensitivity to external impacts and how they may be restored The text is illustrated by numerous examples emphasising functional and holistic approaches to wetland management including case studies on the wise use and rehabilitation of wetlands in farmed urban industrial and other damaged environments highlighting the long term benefits of multiple use The Wetlands Handbook will provide an invaluable reference for researchers managers policy makers and students of wetland sciences Nature in Ireland John Wilson Foster, Helena C. G. Chesney, 1998 How has Irish nature been studied How has it been expressed in literature and popular culture How has it influenced and been influenced by political economic and social change These long neglected questions are pursued in Nature in Ireland a pioneering collection of original essays by leading naturalists science writers and cultural historians who bring us from the geological prehistory of Ireland to the environmental threats of the late twentieth century Irish Peatlands, the Critical Decade Peter J. Foss, 1991 *The Bogs of Ireland* John Feehan, 1996 *The Irish Naturalists' Journal*, 2002 **Reconstructing Quaternary Environments** J. John Lowe, Michael Walker, 2014-10-28 This third edition of Reconstructing Quaternary Environments has been completely revised and updated to provide a new account of the history and scale of environmental changes during the Quaternary The evidence is extremely diverse ranging from landforms and sediments to fossil assemblages and geochemical data and includes new data from terrestrial marine and ice core records Dating methods are described and evaluated while the principles and practices of Quaternary stratigraphy are also discussed The volume concludes with a new chapter which considers some of the key questions about the nature causes and consequences of global climatic and environmental change over a range of temporal scales This synthesis builds on the methods and approaches described earlier in the book to show how a number of exciting ideas that have emerged over the last two decades are providing new insights into the operation of

the global earth ocean atmosphere system and are now central to many areas of contemporary Quaternary research This comprehensive and dynamic textbook is richly illustrated throughout with full colour figures and photographs The book will be of interest to undergraduates postgraduates and professionals in Earth Science Environmental Science Physical Geography Geology Botany Zoology Ecology Archaeology and Anthropology

Conserving Peatlands Lucy Parkyn, Rob E. Stoneman, Hugh A. P. Ingram, 1997 Peatlands are a unique and fast disappearing landscape More and more countries are recognizing this situation and putting protective legislation into place It is therefore important to understand all the processes and influences that are involved in sustaining the remaining examples of this fragile ecosystem Addressing two key questions why should peatlands be conserved and how should this conservation be achieved this book brings together the leading workers in the area whose contributions have been developed from the Peatlands Convention in Edinburgh The book summarizes the current situation regarding peatlands and bogs and sets the agenda for their future survival This work is important reading for all environmental scientists and practitioners working with peatlands and bogs The book is also relevant to all government policy makers and voluntary bodies involved in sustaining biodiversity

Wetlands of Ireland Marinus L. Otte, 2003 Ireland is famous or notorious for its wet and mild climate Because on average more water precipitates than evaporates the island is rich in wetlands marshes swamps fens bogs lagoons floodplains and wet meadows to name but a few Many place names in Ireland refer to wet places Words derived from the Irish language are used to refer to a particular type of wetland such as callows for the floodplains of the River Shannon or turlough for a type of ephemeral wetland found almost exclusively in Ireland This book brings together specialists in wetland science discussing a wide range of topics from an Irish perspective including the ecology fauna vegetation and distribution of various types of wetlands the use of wetlands for wastewater management the archaeology of wetlands and protection and conservation It is intended for a wide audience of wetland enthusiasts not just for professionals but also for those who through their hobbies have a passion for those wet and wild places

Peatlands, Economy and Conservation M. G. C. Schouten, M. J. Nooren, 1990 Contributions to the symposium Peatlands in perspective organised by WWF Staatsbosbeheer Natuurmonumenten and the Dutch Foundation for Conservation of Irish Bogs

Ireland David Cabot, 1999 David Cabot an expert in his field provides a comprehensive view of all the different types of habitat to be found in Ireland from the peatlands and fens to the mountains and uplands from broad leaved woodland to coastal zones The book examines the history and ecology of each of these habitats and describes the rich variety of flora
