Professor Margaret Archer is a leading critical realist and major contemporary social theorist This edited collection seeks to celebrate the scope and accomplishments of her work distilling her theoretical and empirical contributions into four sections which capture the essence and trajectory of her research over almost four decades Long fascinated with the problem of structure and agency Archer s work has constituted a decade long engagement with this perennial issue of social thought However in spite of the deep interconnections that unify her body of work it is rarely treated as a coherent whole This is doubtless in part due to the unforgiving rigour of her arguments and prose but also a byproduct of sociology s ongoing compartmentalisation This edited collection seeks to address this relative neglect by collating a selection of papers spanning Archer s career which collectively elucidate both the development of her thought and the value that can be found in it as a systematic whole This book illustrates the empirical origins of her social ontology in her early work on the sociology of education as well as foregrounding the diverse range of influences that have conditioned her intellectual trajectory the systems theory of Walter Buckley the neo Weberian analysis of Lockwood the critical realist philosophy of Roy Bhaskar and more recently her engagement with American pragmatism and the Italian school of relational sociology What emerges is a series of important contributions to our understanding of the relationship between structure culture and agency Acting to introduce and guide readers through these contributions this book carries the potential to inform exciting and innovative sociological research *Structural Stability And Morphogenesis* Rene Thom,1989-01-21 *The Morphogenesis of Intension and Structural Stability of Motifs* Bernhard Bierschenk,2005

**The Morphogenesis of Intention and Structural Stability of Motifs** Bernhard Bierschenk,2005 Methodological Foundations of Macroeconomics Alessandro

Vercelli,1991-09-26 This book is an investigation of the methodological and epistemological foundations of macroeconomic theory based on an examination of the theories of Keynes and Lucas It is divided into two parts In the first Professor Vercelli discusses the methodological issues which lie behind the conflict among different schools of thought in macroeconomics equilibrium and disequilibrium risk and uncertainty rationality and causality These issues are central to the current debate not only in many branches of economics but also in other scientific disciplines The traditional point of view of science based on equilibrium stability and determinism has been increasingly challenged by a new point of view in which disequilibrium instability and uncertainty play a crucial role This the author argues is bound to put macroeconomics in a new more promising position In the second part of the book the author compares the two main alternative research programmes in macroeconomics that outlined by Keynes in his General Theory and that suggested by Lucas the leader of the new classical economists
