Structural Rigidities And Policy Inertia In Interwar Belgium:

Middenstandsbeweging en beleid in België Peter Heyrman,1998 *August-Edmond de Schryver, 1898-1991* Godfried Kwanten,2001 **Belgium's Dilemma** Jonathan A. Epstein,2014-03-27 In Belgium s Dilemma The Formation of Belgian Defense Policy 1932 1940 Jonathan Andrew Epstein presents for the first time in English a detailed examination of the formation of Belgian defense policy in the eight years leading up to the crucial World War II Blitzkrieg campaign in Western Europe Belgium s decision to renounce military ties with France in 1936 has been widely criticized as a fatal mistake but it was in fact a reasonable response to Belgium s situation and was not a significant factor in the Allied defeat Drawing on Belgian documents Jonathan Andrew Epstein looks at the leaders and issues that shaped the Belgian army of 1940 and demonstrates that while mistakes were made most of the decisions were sound Politieke geschiedenis van België Els de Witte,Dirk Luyten,Alain Meynen,2016-09-23 Een historisch perspectief bieden bij het interpreteren van de actuele spanningen in de Belgische politiek dat is het doel van dit inmiddels klassieke overzichtswerk Daarom werd het voor deze tiende druk volledig geactualiseerd en bijgewerkt Els Witte Alain Meynen en Dirk Luyten beschrijven het politieke proces in zijn bredere maatschappelijke context Niet alleen de strijd om de macht in de politiek en de Wetstraat maar ook de economische en sociale veranderingen en de pressiegroepen die ze mee doordrukten worden belicht Alle belangrijke gebeurtenissen vanaf 1830 worden op thematisch chronologische wijze belicht met als rode draden de sociaal economische de levensbeschouwelijke en de communautaire tegenstellingen in ons land Ook heel recente ontwikkelingen zoals de bankencrisis BHV en de zesde staatshervorming de aanvallen in Zaventem en de Brusselse metro et cetera komen ter sprake Het resultaat is een levend en volledig geactualiseerd standaardwerk Het boek bevat een uitgebreide bibliografie een personenen zakenregister en een chronologisch overzicht van de regeringen sinds 1830 **Haven in de branding** Reginald Loyen,2008 De haven van Antwerpen telt vandaag de dag 65 000 voltijdse banen en genereert bijna 3% van het bruto binnenlands product Over de manier waarop dit economische complex tot stand kwam is maar weinig bekend behalve dat er sinds 150 jaar een bijna explosieve groei moet hebben plaatsgevonden Haven in de branding analyseert voor het eerst het tijdschap de oorzaken en gevolgen van deze groei op basis van de goederen stromen en de toegevoegde waardecreatie Zo wordt de waarde van de Antwerpse staaltrafiek verduidelijkt net als de impact van de tonnage balans de mythe van de spoorweghaven Antwerpen en het Belgische karakter van de overslag Ook de groei bij inter nationale concurrenten Rotterdam en Hamburg komt aan bod Centraal staat de vraag hoe de haven van Antwerpen goederen stromen kon aantrekken Was de haven gelijk een rots in de branding overgeleverd aan de grillen van de stroming of hadden havenarbeiders en havenbestuurders invloed op de richting en de sterkte van de stroom **The European Economy 1914-2000** Derek Aldcroft,2002-01-10 As in earlier editions of this work Professor Aldcroft presents a succinct and lucid account of the development and problems of the European economy throughout the twentieth century The text divides into

several clearly defined sub periods the aftermath of the First World War and reconstruction in the 1920s the depression and recovery of the 1930s the impact of the Second World War and the new division of Europe the postwar boom of the 1950s and 1960s the growth slowdown of the 1970s and the pervasive problems of inflation and unemployment

Banking, Currency, and Finance in Europe Between the Wars

Charles H. Feinstein, 1995-09-28 The financial history of interwar Europe was dominated by catastrophic episodes of hyper inflation dramatic exchange rate crises massive and destabilizing movements of gold and capital and extensive banking failures In their attempt to restore and sustain the gold standard as the basis of the international monetary system many countries were compelled to resort to deflationary fiscal and monetary policies of exceptional severity The policies thus adopted in the 1920s were a major cause of the Great Depression of 1929-33 and this in turn exerted a powerful influence on the subsequent political and economic history of the 1930s This collection of essays is the work of an international network of economic historians from Europe and the United States convened by the European Science Foundation It brings together in an accessible style current knowledge and understanding of the nature and effects of these developments in banking currency and finance in the interwar period The topics are examined at three levels In Part I a substantial introductory survey of the central issues over the entire period is followed by special studies of the banking crises the global capital flows and the interrelationship of economic and political policies with each of these themes considered in an international perspective Part II is devoted to illuminating comparative analyses of the financial and exchange policies of pairs of countries France and Italy Britain and Germany Sweden and Finland and Belgium and France In Part III the essays move to the level of individual countries and each contributor explores topics such as the form and efficacy of official banking and monetary policies the role of the central bank movements in the money supply and prices the relationship between the banks and the industrial sector changes in exchange rates and foreign capital investment The volume covers all the major countries and also makes available the results of recent research on banking and finance in smaller countries such as Spain Austria Norway Poland Portugal Bulgaria and Ireland The questions addressed by this book and the themes and patterns it reveals are relevant both to economic and political historians of the years between the two world wars and to those interested in contemporary banking and financial problems

De Nederlandse industrie 1913-1965 Harmen Jan de Jong,1999 Tijdens de eerste helft van de twintigste eeuw is de industrie de meest dynamische sector van de Nederlandse economie De verwerkende nijverheid profiteert tijdens en na de Eerste Wereldoorlog van de neutrale positie van Nederland en verbreedt zich verder tijdens de jaren dertig veertig en vijftig Grote bedrijfstakken in deze periode zijn de voedingsmiddelen de textiel en de metaalnijverheid De verschillende industrieën binnen de genoemde takken ontwikkelen zich echter niet in gelijke mate Deze studie analyseert de aard van dit groeiproces aan de hand van cijfers van de productie en de werkgelegenheid in de diverse industrieën Om de productieve prestatie van de Nederlandse nijverheid in een internationaal perspectief te plaatsen is een vergelijking gemaakt met de Belgische Duitse en Britse industrie Hieruit blijkt dat Nederland in de jaren twintig en dertig een krachtige inhaalbeweging ten opzichte van deze landen kent resulterend in een naar verhouding hoog industrieel productiviteitsniveau Tijdens de jaren veertig valt dit niveau echte sterk terug Aangetoond wordt dat dit niet zozeer een gevolg is van directe oorlogsschade maar eerder van de sterke overheidsregulering gedurende de tweede helft van de jaren dertig en de jaren veertig De regulering heeft onder meer tot gevolg dat de werkgelegenheid in de industrie sterk toeneemt De keerzijde hiervan is een vermindering van de doelmatigheid van de industriële productie Het aanvankelijk lage productiviteitsniveau na 1945 biedt vervolgens ruimte voor een nieuwe fase van spectaculaire inhaalgroei tijdens de jaren vijftig en zestig

Griffiths,1987-05-31 On 26 September 1936 deep in the night

the Dutch cabinet took the decision to cut the guilder's link with gold and to devalue its currency. It was the last of the increasingly isolated and beleaguered gold bloc countries to do so, having outlasted Switzerland by less than a day, the last country in Europe in which holders of a currency could exchange it for gold at the rate which had prevailed before the First World War, the last country to leave the gold standard. The reason why the Gold Bloc, which in September 1936 comprised only France, Switzerland and the Netherlands, should have hung on so long is something of a puzzle to historians, since it has become virtually axiomatic that their recoveries would have begun sooner and proceeded more strongly had they cut the link with gold and devalued their currencies much earlier. The fact that the decision not to do so has been seen as perverse, combined with the fact that in order to cope with the consequences of that decision, governments chose to adopt deflationary policies to correct the economy, has led historians for a long time to dismiss a whole generation of politicians and their advisors as stubborn, conservative and short sighted. The Keynesian revolution and the long post war economic boom had consigned them and their ilk to the dustbin of history for ever.
