N. Bogolyubov, 2013-12-20 *Consonant Clusters and Structural Complexity* Philip Hoole, Lasse Bombien, Marianne Pouplier, Christine Mooshammer, Barbara Kühnert, 2012-10-01 There is currently a wealth of activity involving the analysis of complex segmental sequences from phonetic phonological and psycholinguistic perspectives This volume draws from selected contributions to the conference Consonant Clusters and Structural Complexity held in Munich in August 2008 Consonant sequences whether occurring within individual lexical items or emerging in running speech at word boundaries give particularly striking evidence for the temporal complexity of human speech But contributions also consider the integration of tonal and vocalic elements into syllable structure The main aim of the volume is to do justice to this complexity by bringing together researchers from a wide range of backgrounds The book is organized into four main sections entitled Phonology and Typology Production Analysis and Models Acquisition and Assimilation and reduction in connected speech *Structure of complex nuclei : lectures presented at an international summer school for physicists* Nikolaj N.
