**The Structures of the Life World** Alfred Schutz, Thomas Luckmann, 1973 The Structures of the Life World is the final focus of twenty seven years of Alfred Schutz's labor encompassing the fruits of his work between 1932 and his death in 1959 This book represents Schutz's seminal attempt to achieve a comprehensive grasp of the nature of social reality Here he integrates his theory of relevance with his analysis of social structures Thomas Luckmann a former student of Schutz's completed the manuscript for publication after Schutz's untimely death *The Structures of the Life-world* Alfred Schutz, Thomas Luckmann, 1973 The Structures of the Life World is the final focus of twenty seven years of Alfred Schutz's labor encompassing the fruits of his work between 1932 and his death in 1959 This book represents Schutz's seminal attempt to achieve a comprehensive grasp of the nature of social reality Here he integrates his theory of relevance with his analysis of social structures Thomas Luckmann a former student of Schutz's completed the manuscript for publication after Schutz's untimely death **The Structures of the Life-world. [By] Alfred Schutz and Thomas Luckmann. Translated [from the German MS.] by Richard M. Zaner and H. Tristram Engelhardt, Jr** Alfred Schütz, Thomas Luckmann (Joint Author. 01), 1973 *The Structures of the Life-world* Alfred Schutz, 1974 **The Essentials of Husserl: Studies in Transcendental Phenomenology** V. C. Thomas, 2023-01-31 Known as the founder of the phenomenological movement this book examines Husserl's various phases of phenomenology during his realist transcendental static genetic and post Crisis of European Sciences periods Consisting of ten carefully researched and thoroughly examined essays this book describes Husserl's concepts and ideas through numerous examples and diagrammatic representations in a bid to elucidate the nuances of phenomenology for its readers Valuable insights into Husserl's realist phase are made in the chapter on Meaning and the chapters on Natural Attitude Epoch and Phenomenological Reduction while the chapter on Noesis Noema symbolizes the transcendental phase Thomas points out Husserl's transition from static to genetic phenomenology in the chapter on Lived Body with the chapters on Lifeworld and the Notion of the Other later focusing on this perspective Husserl's entire phenomenological space including his pre phenomenological period are covered in the chapter on Lived Time However the chapters on Phenomenology The Study of Self and Beyond and Consciousness and Intentionality are the fulcrums upon which the edifice of phenomenology turns The final chapter on Presuppositionlessness in phenomenology expresses Thomas's personal enquiries into Husserl's contention that phenomenology is a presuppositionless science This book will be of particular interest to research scholars and post graduate students in the areas of Philosophy and Social Sciences as well as those interested in contemporary Western Philosophy and the history and development of Ideas *Habermas' Concept of the Lifeworld* Christopher Latiolais, 1992 **Modern Individuality in Hegel's Practical Philosophy** Erzsébet Rózsa, 2012-10-19 In Modern Individuality in Hegel's Practical Philosophy Erzsébet Rózsa aims to reconstruct Hegel's theory of individuality in the light of his idea of modernity Modern individuality is one of the central topics of Hegel's practical

philosophy discussed systematically in the forms of subjectivity in subjective objective and practical spirit Hegel interpreted modern existence and lifeworld in the context of law politics economy and private life Infinite subjective freedom is the historical principle of the modern age as well as the basic determination of modern individual forms of existence and knowledge Modern form of life and mentality based on the values and practical actions of self knowledge and self determination is an achievement of historical significance This radical turn however gives a new perspective to the problem of good life the normative role of substantial values is overshadowed by the stabilizing function of the objective order of institutions

**The New Natural Resource** Hans Christian Garmann Johnsen, 2016-03-03 Increasingly in the public discourse there are references to the knowledge economy knowledge society knowledge workers and knowledge organisations The argument is that knowledge is becoming the main economic resource replacing the natural resources that drove the industrial revolution The new knowledge economy is driven by knowledge development innovation and highly skilled employees Increasing investment in higher education and in universities is in line with this strategy and understanding In an earlier book *Creating Collaborative Advantage* edited with Richard Ennals Professor Hans Christian Garmann Johnsen argued that it is knowledge that links social and economic processes He believes that what is missing in the current discussion on innovation is a conceptualisation of exactly what knowledge is In *The New Natural Resource* he digs deeper into what it is and how it develops and subsequently leads to widespread change The author argues that knowledge is inherently a social phenomenon That is why social processes are closely linked to economic development and why this relationship becomes even more apparent in the new knowledge economy Knowledge is not an objective entity established once and for all Knowledge development is interrelated with values norms perceptions and interpretations We need to know what the mechanisms are by which knowledge becomes legitimate true and relevant

**Edmund Husserl and His Critics, an International Bibliography (1894-1979)** François Lapointe, 1980 *Science Meets Philosophy* Hans Christian Garmann Johnsen, 2023-04-26 The book is an attempt to bring together what are often seen as incommensurable scientific and philosophical positions Its core argument is that a main reason for the divisions about what constitutes scientific knowledge relates to disagreements on philosophical issues The book explores what these disagreements are about and discusses whether they can be overcome Taking a historical perspective the book traces the divides in science back to three main philosophical traditions realism idealism and scepticism It maps how these have inspired three main current positions in science logical empiricism phenomenology and sociology of scientific knowledge The book is intended for a general audience concerned with today's debates on scientific knowledge and society It will be useful for students and researchers studying philosophy of science sociology of scientific knowledge realism phenomenology positivism logical empiricism analytical philosophy and sustainable scientific knowledge

*Contemporary Philosophy in Scandinavia* Raymond E. Olson, 1972 *Telos*, 2006 *Danish Yearbook of Philosophy*, 1995 **Narrative and Morality** Paul Nelson, 1987 This

book analyzes a rich and diverse body of philosophical and theological literature concerning the import of narrative for the understanding of morality Nelson begins by examining the theses that to understand oneself a tradition and history as a whole they must be understood in the context of a narrative Recent philosophical writings on the relation of narrative to the moral concepts of social groups and individuals including Alasdair MacIntyre's proposal for the rehabilitation of an ethic of virtue shaped by narrative are explored Issues discussed include the freedom of moral agents in relation to their narratives the relation between narrative and universal moral rules and the problem of relativism Next Nelson classifies theological uses of narrative as belonging to either a liberal universalistic or postliberal particularistic tradition and considers the implications of construing scripture as narrative for the problematic relation between scripture and ethics The work of Stanley Hauerwas the foremost narrativist in Christian ethics is analyzed at length Nelson argues that while narrative is a necessary focus it does not exhaust the methodological agenda Narrative is not as its advocates sometimes suggest a universal solvent for every theological problem and disagreement An adequate Christian ethics must not lose sight of the universal narrative independent features of morality Since the realm of the moral is an interweaving of narrative dependent and narrative independent features Christian ethics stands to profit from both narrativist coherentist and rationalist foundationalist insights The role of narrative is demonstrably a major topic of conversation across several fields in religious studies today Particularly designed for scholars in ethics theology and the philosophy of religion the book is a reliable guide to an expanding literature and a judicious introduction to these interdisciplinary discussions
