Structuring Conflict In The Arab World Incumbents Opponents And Institutions:

Structuring Conflict in the Arab World Ellen Lust-Okar, 2005-01-10 This book examines how ruling elites manage and manipulate their political opposition in the Middle East In contrast to discussions of government opposition relations that focus on how rulers either punish or co opt opponents this book focuses on the effect of institutional rules governing the opposition It argues rules determining who is and is not allowed to participate in the formal political arena affect not only the relationships between opponents and the state but also between various opposition groups This affects the dynamics of opposition during prolonged economic crises It also shapes the informal strategies that ruling elites use toward opponents The argument is presented using a formal model of government opposition relations It is demonstrated in the cases of Egypt under Presidents Nasir Sadat and Mubarek Jordan under King Husayn and Morocco under King Hasan II **The Dynamics**

of Opposition Cooperation in the Arab World Hendrik Kraetzschmar, 2014-01-02 Within the democratisation literature opposition unity is widely seen as an important requisite to successfully pressure authoritarian rulers into liberalising reforms and in bringing about democratic change Taking up on this theme this book examines the myriad ways in which opposition groups across the Arab world have sought to coalesce into broader reform coalitions at the local national and transnational levels to challenge authoritarian incumbents and their policies Drawing on original case studies from the region it sheds light on the diverse nature and objectives of these reform coalitions and explores the challenges opposition groups face in Arab states in uniting behind a common reform agenda and in driving this agenda forward Be they electoral pacts local government coalitions broader opposition alliances or networks of resistance this book demonstrates that although widespread the record of collective opposition activism in the Arab world is mixed with many reform coalitions lacking the necessary cohesion and mass appeal to effectively mobilise for change This book was originally published as a special issue of British Journal of Middle Eastern Studies After Repression Elizabeth R. Nugent, 2020-09-01 How differing forms of repression shape the outcomes of democratic transitions In the wake of the Arab Spring newly empowered factions in Tunisia and Egypt vowed to work together to establish democracy In Tunisia political elites passed a new constitution held parliamentary elections and demonstrated the strength of their democracy with a peaceful transfer of power Yet in Egypt unity crumbled due to polarization among elites Presenting a new theory of polarization under authoritarianism After Repression reveals how polarization and the legacies of repression led to these substantially divergent political outcomes Drawing on original interviews and a wealth of new historical data Elizabeth Nugent documents polarization among the opposition in Tunisia and Egypt prior to the Arab Spring tracing how different kinds of repression influenced the bonds between opposition groups She demonstrates how widespread repression created shared political identities and decreased polarization such as in Tunisia while targeted repression like that carried out against the Muslim Brotherhood in Egypt led opposition groups to build distinct identities that increased polarization among them This helps explain why elites in Tunisia

were able to compromise cooperate and continue on the path to democratic consolidation while deeply polarized elites in Egypt contributed to the rapid reentrenchment of authoritarianism Providing vital new insights into the ways repression shapes polarization After Repression helps to explain what happened in the turbulent days following the Arab Spring and illuminates the obstacles to democratic transitions around the world **Pacted Democracy in the Middle East** Hicham Alaoui,2022-05-17 This book provides a new theory for how democracy can materialize in the Middle East and the broader Muslim world It shows that one pathway to democratization lays not in resolving important but often irreconcilable debates about the role of religion in politics Rather it requires that Islamists and their secular opponents focus on the concerns of pragmatic survival that is compromise through pacting rather than battling through difficult philosophical issues about faith This is the only book length treatment of this topic and one that aims to redefine the boundaries of an urgent problem that continues to haunt struggles for democracy in the aftermath of the Arab Spring *Iraq, Its Neighbors, and the United States* Henri J. Barkey, Scott Lasensky, Phebe Marr, 2011 This book examines how Iraq s evolving political order affects its complex relationships with its neighbors and the United States The book depicts a region unbalanced shaped by new and old tensions struggling with a classic collective action dilemma and anxious about Iraq s political future as well as America s role in the region all of which suggest trouble ahead absent concerted efforts to promote regional cooperation In the volume s case studies scholars review Iraq s bilateral relationships with Turkey Iran Saudi Arabia the Gulf Arab states Syria and Jordan and explore how Iraq s neighbors could advance the country s transition to security and stability The volume also looks at the United States relations with and long term strategic interests in Iraq and offers recommendations for how the United States can help Iraq strengthen and grow Page 4 of cover **Ben Ali's Tunisia** Anne Wolf, 2023 Based on a wealth of new primary data this book offers the first account of the internal regime factors that caused the fall of Zine el Abidine Ben Ali s long dictatorship in Tunisia during the Arab Uprisings It challenges studies that focus mass mobilization alone and examines the role of a secret coup d tat staged by regime figures in 2011 Contentious Politics in the Middle East Holger Albrecht, 2010 A fine collection of empirically rich and thoughtful studies on a topic of considerable interest Its fine grained analyses of individual countries organizations and episodes of regime opposition interaction make an important contribution to our understanding of authoritarian rule in the Middle East and beyond David Waldner University of Virginia Clearly addresses a gap in the literature on Middle East politics by focusing on various oppositions within different countries of the region Deepens understanding of the concepts of opposition and contentious politics within authoritarian political systems Nicola Pratt University of Warwick Scholarship examining the governments in the Middle East and North Africa rarely focuses on opposition movements since those countries tend to be ruled by a centralized often authoritarian government However even in an oppressive state there are civil society and oppositional forces at work The contributors to Contentious Politics in the Middle East reveal how such forces emerge and are manifested in nondemocratic states across the region In

most cases the essays offer a comparative perspective highlighting similarities across political borders Providing historical context for current events they examine the sociopolitical situations in Egypt Syria Jordan Kuwait Bahrain Iraq Morocco Tunisia Lebanon and Algeria and analyze the role of Islam in Arab states governments and in the opposition movements to them They also demonstrate that not all opposition forces propose the overthrow of authority and point out the various forms opposition takes in societies that leave little room for political activism The contributors to the volume are drawn from countries across three continents and bring backgrounds in political science conflict resolution and history Challenging the assertion that state society relations are limited to coercive top down arrangements in authoritarian regimes the book will inspire debate on the topic of contentious political participation within the region as well as in similar settings throughout the world

Radical Separation of Powers Wael Hallaq, 2006-01-08 Two centuries of Orientalist scholarship have denied that Islam has a constitutional concept Premodern Islamic political practice has been subject to mistranslation misinterpretation and condescension through the eyes of colonisers and judged inferior to the norms of Western liberalism Wael Hallaq a leading scholar of Islamic law sets the record straight in this groundbreaking volume Traumatized by the tyranny of absolute monarchies Europe came to see in Islam everything that it despised about itself By seeking to understand Islamic governance from within its own tradition of reason Hallaq reveals premodern Islam to have a rich and distinctive constitutional tradition starting from the individual as a political subject up to the power of executives

Debating Arab Authoritarianism Oliver Schlumberger, 2007-11-20 Examines how political rule in Arab countries is effectuated organized and executed and how authoritarianism works in practice and how it can be grasped conceptually

Political Participation in the Middle East Ellen Lust, 2008 Political participation in authoritarian regimes is usually considered insignificant or important only insofar as it promotes democracy Turning this common wisdom on its head Political Participation in the Middle East demonstrates the vitality variety and significance of political activism across the MENA region Through an in depth exploration of seven countries the authors address how formal and informal political institutions create opportunities for participation in venues as varied as trade unions civic associations political parties and elections And without losing sight of the fact that authoritarian regimes manipulate participation to reinforce their rule they reveal ways in which citizens do benefit by influencing decision making for example or obtaining state resources An engaging read for scholars and students this work vividly illustrates how citizens matter in the politics of authoritarian regimes

Islamism in Morocco Malika Zeghal,2008 Analyzes the historical roots and evolution of Moroccan Islamist movements in the context of a political system that combines pluralistic electoral competition with authoritarian government This book provides a perspective on the prospects for democratization in an Arab country and the role religion plays in that process

Choice ,2005 *Misaligned Interests and Commitment Problems* Vidal Fernando Romero Leon,2005 **Peripheral Visions** Lisa Wedeen,2008-10 The government of Yemen unified since 1990 remains largely incapable of controlling violence or providing goods and services to its population but the regime continues to endure despite its fragility and peripheral location in the global political and economic order Revealing what holds Yemen together in such tenuous circumstances this book shows how citizens form national attachments even in the absence of strong state institutions It argues that national solidarity in such weak states tends to arise not from attachments to institutions but through both extraordinary events and the ordinary activities of everyday life Yemenis for example regularly gather to chew qat a leafy drug similar to caffeine as they engage in wide ranging and sometimes influential public discussions of even the most divisive political and social issues These lively debates exemplify the contention that democratic national and pious solidarities work as ongoing performative practices that enact and reproduce a citizenry s shared points of reference
