Education, Experience and Existence John Quay, 2013-07-18 Education Experience and Existence proposes a new way of understanding education that delves beneath the conflict confusion and compromise that characterize its long history At the heart of this new understanding is what John Dewey strove to expound a coherent theory of experience Dewey s reputation as a pragmatist is well known but where experience is concerned pragmatism is only half the story The other half is phenomenological as crafted by Martin Heidegger Encompassing both is Charles Sanders Peirce whose philosophy draws pragmatism and phenomenology together in an embrace which enables a truly experiential philosophy to emerge The book approaches the problem of confusion in education and philosophy by beginning with our most basic understandings of existence Existence as an interaction is the starting point of modern science and existence as individuality offers an aesthetic origin attending to existence as a simple unity In our contemporary world where scientific ways of thinking are privileged the aesthetic whole is often overlooked especially in education Yet both are connected A coherent theory of experience is therefore a marriage between phenomenology and pragmatism enabling each to maintain its position by acknowledging how both are required The book is divided into three main parts confusion in philosophy and education a coherent theory of experience a coherent theory of education Quay suggests that education benefits from such a coherent theory of experience by better comprehending its connection to life More than just knowing more than just doing education is about being This book will be of interest to philosophers educators and educational philosophers

Latino Education in the U.S. Lourdes Diaz Soto, 2008-09-18 Educators parents policy makers and communities across the country will find this a significant addition to American educational literature and a gold mine of both current information and detailed historical facts Latinos in the United States have fought hard to attain equality especially in the field of education This book focuses on the fight for equal educational access The contributors reveal that many Latino children still

face decades old challenges In addition to such obstacles as cultural conflicts and racism they also face teachers curricula and assessments that are not always respectful to their backgrounds Three major questions form the framework for this landmark work How can schools address issues of educational equity for Latino students in the United States How can curricula be reformed to address the needs of these students How can scholars community activists and parents collaborate for the benefit of Latino learners in the United States School Reform, Corporate Style Dorothy Shipp, 2006 Like other big city school systems Chicago's has been repeatedly reformed over the last century Yet its schools have fallen far short of citizens expectations and left a gap between the performances of white and minority students Many blame the educational establishment for resisting change Other critics argue that reform occurs too often still others claim it comes not often enough Dorothy Shipp reappraises the tumultuous history of educational progress in Chicago revealing that the persistent lack of improvement is due not to the extent but rather the type of reform Throughout the twentieth century managerial reorganizations initiated by the business community repeatedly altered the governance structure of schools as well as the relationships of teachers to children and parents but brought little improvement while other more promising reform models were either resisted or crowded out Shipp chronicles how Chicago's corporate actors led abetted or restrained nearly every attempt to transform the city's school system then asks whether schools might be better reformed by others To show why city schools have failed urban children so badly she traces Chicago's reform history over four political eras revealing how corporate power was instrumental in designing and revamping the system Her narrative encompasses the formative era of 1880-1930 when teachers unions moderated business plans previously unexplored business activism from 1930 to 1980 when civil rights dominated school reform and the decentralization of the 1980s She also covers the uneasy cooperation among business associations in the 1990s to install the mayor as head of the school system a governing regime now challenged by privatization advocates Business people may be too wedded to a stunted view of educators to forge a productive partnership for change Unionized teachers bridle at the second class status accorded them by managers If reform is to reach deeply into classrooms Shipp concludes it might well require a new coalition of teachers unions and parents to create a fresh agenda that supersedes corporate interests This study clearly shows that in Chicago as elsewhere urban schooling is intertwined with politics and power By reviewing more than a century of corporate efforts to make education work Shipp makes a strong case that it's high time to look elsewhere perhaps to educators themselves for new leadership **Kellie McGarrh's Hangin' in Tough** Kellie McGarrh, 2000 In the tradition of Southern school superintendents Mildred E Doyle was a former athlete a jock and a good old boy politician in a tailored suit She was also a great character courageous mischievous and contradictory both beloved and considered odd In Doyle's biography McGarrh analyzes issues that interest educational historians and feminist scholars women's struggles to attain and retain administrative positions differences in the ways men and women supervise and lead and the impact of homophobia on those who are not stereotypically masculine or feminine

Kellie McGarrh s Mildred E Doyle was characterized by ambiguity contradictions and paradox and her life served both to confirm and confound generalizations about women leaders Education, Research and Perspectives ,2004
