

Stuart Models 1989 9

Chantel M. Lavoie

Stuart Models 1989 9:

Aemilia Lanyer Marshall Grossman, 2021-05-11 Aemilia Lanyer was a Londoner of Jewish Italian descent and the mistress of Queen Elizabeth's Lord Chamberlain. But in 1611 she did something extraordinary for a middle class woman of the seventeenth century: she published a volume of original poems using standard genres to address distinctly feminine concerns. Lanyer's work is varied, subtle, provocative, and witty. Her religious poem *Salve Deus Rex Judaeorum* repeatedly projects a female subject for a female reader and casts the Passion in terms of gender conflict. Lanyer also carried this concern with gender into the very structure of the poem, whereas a work of praise usually held up the superiority of its patrons. The good women in Lanyer's poem exemplify worth; women in general. The essays in this volume establish the facts of Lanyer's life and use her poetry to interrogate that of her male contemporaries: Donne, Jonson, and Shakespeare. Lanyer's work sheds light on views of gender and class identities in early modern society. By using Lanyer to look at the larger issues of women writers working within a patriarchal system, the authors go beyond the explication of Lanyer's writing to address the dynamics of canonization and the construction of literary history.

Collecting Women Chantel M. Lavoie, 2009 This book addresses the place of women writers in anthologies and other literary collections in eighteenth century England. It explores and contextualizes the ways in which two different kinds of printed material: poetic miscellanies and biographical collections, complemented one another in defining expectations about the woman writer. Far more than the single authored text, it was the collection in one form or another that invested poems and their authors with authority. By attending to this fascinating cultural context, Chantel Lavoie explores how women poets were placed posthumously in the world of eighteenth century English letters. Investigating the lives and works of four well-known poets: Katherine Philips, Aphra Behn, Anne Finch, and Elizabeth Rowe, Lavoie illuminates the way in which celebrated women were collected alongside their poetry, the effect of collocation on individual reputations, and the intersection between bibliography and biography as female poets themselves became curiosities. In so doing, *Collecting Women* contributes to the understanding of the intersection of cultural history, canon formation, and literary collecting in eighteenth century England.

Women Letter-Writers in Tudor England James Daybell, 2018-09-26 This book represents the most comprehensive study of women's letters and letter writing during the early modern period so far undertaken and acts as an important corrective to traditional ways of reading and discussing letters as private elite male and non-political. Based on over 3,000 manuscript letters, it shows that letter writing was a larger and more socially diversified area of female activity than has been hitherto assumed. In that letters constitute the largest body of extant sixteenth century women's writing, the book initiates a reassessment of women's education and literacy in the period. As indicators of literacy, letters yield physical evidence of rudimentary writing activity and abilities; document higher forms of female literacy; and highlight women's mastery of formal rhetorical and epistolary conventions. The book also stresses that letters are unparalleled as intimate and immediate records of family relationships and as media for personal and

self reflective forms of female expression Read as documents that inscribe social and gender relations letters shed light on the complex range of women s personal relationships as female power and authority fluctuated negotiated on an individual basis Furthermore correspondence highlights the important political roles played by early modern women Female letter writers were integral in cultivating and maintaining patronage and kinship networks they were active as suitors for crown favour and operated as political intermediaries and patrons in their own right using letters to elicit influence Letters thus help to locate differing forms of female power within the family locality and occasionally on the wider political stage and offer invaluable primary evidence from which to reconstruct the lives of early modern women

Women and Religion in England, 1500-1720 Patricia Crawford,1996 Patricia Crawford explores how the study of gender can enhance our understanding of religious history in this study of women and their apprehensions of God in early modern England **The Building of Elizabethan and Jacobean England** Maurice Howard,2007 Transformation an introduction Bare ruin d choirs re visited All this new building the urban landscape A language for architecture The role of patrons Representing buildings
